2. Accounting policies

2.1 Basis of preparation of financial statements

The company's functional and presentational currency is pound sterling.

The following principal accounting policies have been applied:

2.2 Going concern

The director is assessing, on a daily basis, the impact of the significant uncertainty arising from the COVID-19 virus. Whilst the director appreciates there is significant uncertainty surrounding the future economic climate, he is of the opinion that the impact on the company is minimal due to the nature of the industry. Shareholders' funds amounted to a net deficit of £64,595 (2019 - £64,928). The director has considered the implications of the Insolvency Act 1986 and regard the balance sheet position as temporary only. The director has ensured that adequate funding will be available throughout the year to meet the company's liabilities when they fall due. For this reason, the director continues to adopt the going concern basis of accounting in the preparing the financial statements.

2.3 Turnover

Turnover is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. Turnover is measured as the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes. The following criteria must also be met before revenue is recognised:

Rendering of services

Turnover from a contract to provide services is recognised in the period in which the services are provided in accordance with the stage of completion of the contract when all of the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the company will receive the consideration due under the contract;
- the stage of completion of the contract at the end of the reporting period can be measured reliably; and
- the costs incurred and the costs to complete the contract can be measured reliably.

2. Accounting policies (continued)

2.4 Taxation

Tax is recognised in profit or loss except that a charge attributable to an item of income and expense recognised as other comprehensive income or to an item recognised directly in equity is also recognised in other comprehensive income or directly in equity respectively.

The current corporation tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the balance sheet date in the countries where the company operates and generates income.

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the Balance sheet date, except that:

- The recognition of deferred tax assets is limited to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits; and
- Any deferred tax balances are reversed if and when all conditions for retaining associated tax allowances have been met.

Deferred tax balances are not recognised in respect of permanent differences except in respect of business combinations, when deferred tax is recognised on the differences between the fair values of assets acquired and the future tax deductions available for them and the differences between the fair values of liabilities acquired and the amount that will be assessed for tax. Deferred tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

2.5 Debtors

Short term debtors are measured at transaction price, less any impairment.
