Notes to the Abbreviated Accounts

For the year ending 31 December 2010

1 **Accounting policies**

Basis of accounting

The accounts have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents the total amount receivable in the ordinary course of business for goods sold and services provided, excluding VAT.

Stocks

Stocks are valued at the lower of cost and net realisable value.

Finance lease agreements

Where the company enters into a lease which entails taking substantially all the risks and rewards of ownership of an asset, the lease is treated as a finance lease. The asset is recorded in the balance sheet as a tangible fixed asset and is depreciated in accordance with the above depreciation policies. Future instalments under such leases, net of finance charges, are included within creditors. Rentals payable are apportioned between the finance element, which is charged to the profit and loss account on a straight line basis, and the capital element which reduces the outstanding obligation for future instalments.

Operating lease agreements

Rentals applicable to operating leases are charged to the Profit and Loss account on a straight line basis over the period of the lease.

Deferred taxation

Deferred taxation is recognised in respect of all timing differences that have originated but not reversed by the balance sheet date.

Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives.

Plant & Machinery	10% straight line basis
Fixtures & Fittings	25% straight line basis
Motor Vehicles	25% straight line basis
Leasehold Property	10% straight line basis
