2. Significant accounting policies

Basis of preparation

These financial statements have been prepared in accordance with IFRSs as adopted by the EU and IFRIC interpretations and with those parts of the Companies Act 2006 applicable to Companies reporting under IFRS.

The accounting policies adopted are consistent with those of the previous financial period except for those which the Company has adopted in the year.

The financial statements have been prepared on a going concern basis under the historical cost convention except for the revaluation of certain financial instruments. The principal accounting policies adopted are set out below.

Taxation

Current tax, including UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Provision is made for deferred tax so as to recognise all temporary differences which have originated but not reversed at the balance sheet date that result in an obligation to pay more tax, or a right to pay less tax in the future.

This is calculated on a non-discounted basis by reference to the average tax rates that are expected to apply in the relevant jurisdiction and for the year in which the temporary differences are expected to reverse. Deferred tax assets are assessed at each balance sheet date and are only recognised to the extent that their recovery against future taxable profits is probable.

Notes to the financial statements for the year ended 30 September 2012

2. Significant accounting policies (continued)

Foreign currency

Transactions in currencies other than the functional currency of the Company are translated at the exchange rate on the date of the transaction. Foreign currency monetary assets and liabilities held at the year end are translated at year end exchange rates. The resulting exchange gain or loss is taken through the income statement.

Trade and other receivables

Trade and other receivables are recognised at their fair value and subsequently recorded at amortised cost using the effective interest method as reduced by allowances for estimated irrecoverable amounts. An allowance for irrecoverable amounts is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. The amount of allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows.

Trade and other payables

Trade and other payables are recognised at their fair value and subsequently recorded at amortised cost using the effective interest method.

Cash flow statement

The company had no cash flows in the current year. Its cash flow obligations were settled by fellow group undertakings. Accordingly, no separate cash statement has been presented with these financial statements.

Administrative expenses

The Company has no employees. Administrative expenses of the Company, including audit fees of £500 (2011 £500) and directors' remuneration, were borne by Thomas Cook Group plc, the Company's parent undertaking, during both accounting years with no recharge made as the amounts were minimal.

Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Critical judgments in applying the Company's accounting policies

In the process of applying the Company's accounting policies, described above, management has made the following judgments that have the most significant effect on the amounts recognised in the financial statements.

Recoverable amounts of intercompany receivables

Judgments have been made in respect of the amounts of future operating cash flows to be generated by certain of the Company's fellow subsidiaries in order to assess whether there has been any impairment of the amounts included in the balance sheet for receivables from those businesses.
