Vantage Infrastructure (UK) Limited

Strategic Report for the Year Ended 31 December 2020

The directors present their strategic report on Vantage Infrastructure (UK) Limited ("the Company") for the year ended 31 December 2020.

Review of the business

The Company is an independent, specialist investment manager focused on building relevant debt and equity solutions within the infrastructure sector to address its clients' needs. The Company intends to grow Assets Under Management by structuring relevant debt and equity investments for existing clients with undrawn commitments, and by raising additional capital from existing and new clients. The company is actively in the market seeking new sources of capital to facilitate this growth.

The Company is a subsidiary of Vantage Infrastructure Holdings Limited ("the Group").

The key activities undertaken by the Company are:

- Marketing activities to raise new infrastructure equity and infrastructure debt capital commitments.
- The provision of specialist investment management services to the Company's mandate clients.
- The provision of specialist investment management services in the United Kingdom and Europe to Vantage Infrastructure (USA) Inc's ("Vantage USA") mandate clients in accordance with an Intragroup Service Agreement in place between the Company and Vantage USA.
- The provision of group corporate functions to Vantage USA, Vantage Infrastructure (Asia) Pte Ltd ("Vantage Asia") and Vantage Infrastructure (Australia) Pty Ltd ("Vantage Australia") in accordance with an Intragroup Service Agreement in place between the Company, Vantage USA, Vantage Asia and Vantage Australia.

During the year, the Company strengthened existing client relationships, which resulted in increased financial commitments from some clients. Business development and capital raising activities resulted in the Company securing one new client, structured as a managed fund-of-one, using the Group's owners' Irish Collective Asset Management Vehicle platform.

Despite significant market challenges due to the on-going COVID-19 pandemic, Assets Under Management increased by 16%, resulting from deployment and reflecting active broad investment resilience and deployment of asset management strategies to maintain and grow underlying asset valuations.

In 2020, the Vantage Group undertook a detailed strategic review of the global business. The strategic review resulted in recommendations from management that were endorsed by the Board and will result in targeted overhead cost reductions for the Group. One recommendation related to the optimal strategy for fundraising has resulted in a restructuring of the Group's business development function including a wind down of the Group's subsidiary, Vantage Infrastructure (Asia) Pte. Limited, which will be implemented in 2021.

With overhead cost reductions in the Group and a reallocation of capital-raising resources, the directors believe the Company is well positioned to meet asset under management and revenue targets and ensure the business will generate sustainable profits in 2021 and beyond.

Vantage Infrastructure (UK) Limited

Strategic Report for the Year Ended 31 December 2020 (continued)

Key performance indicators

The key performance indicators of the Company are shown below:

		2020	2019
		£	£
Assets under management	(1)	3,569,864,000	3,059,625,000
Revenue		10,995,517	10,047,345
Employee, Administrative and Other Operating Expenses		8,691,256	9,012,105
Current ratio (total current assets / total current liabilities)	(2)	2.01	1.89

(1) as at year-end

(2) current ratio indicates the Company remains financially secure and can cover its liabilities

Business performance and position

The Company recorded a profit of £397,188 in the year (2019: loss of £610,182). Excluding equity settled share based payment expenses (see note 5 - Staff costs), the Company recorded a profit of £902,039 in the year (2019: loss of £116,529).

The Company's total assets at 31 December 2020 were £10,710,654 (31 December 2019: £9,233,853).

The Company's net assets at 31 December 2020 were £5,590,810 (31 December 2019: £4,688,771).

Section 172 statement

In accordance with the Companies (Miscellaneous Reporting) Regulations 2018, the Company sets out below its statement.

For the year ended 31 December 2020 the directors believe they have acted in good faith and in a manner most likely to promote the success of the Company for the benefit of its shareholders as a whole, and in doing so had regard, amongst other matters, to the areas of focus set out in s.172 (1) (a) to (f) where applicable. The board considers the following to be the key stakeholders of the Company.

Clients

Our clients are central to our business. We build our client relationships in a number of ways, including regular meetings to discuss strategy, investment objectives and performance and regular client reporting. The board is updated on key issues regarding clients at regular board meetings.

Community and environment

The Vantage Group is committed to managing the wider social, environmental and economic impacts of its operations. More information can be found in the Environmental, Social and Governance (ESG) matters section of the Strategic Report.

Employees

The board recognises that our people are our most valuable asset. Further information can be found in the ESG section of the Strategic Report.

Shareholders

The Company is 100% owned by Vantage Infrastructure Holdings Limited, which has representation on the board of the Company and is therefore fully engaged in key decision making. This ensures that the board of the Company is fully aware of the issues within the wider corporate structure and how their decisions might impact the Company and its subsidiaries.

Vantage Infrastructure (UK) Limited

Strategic Report for the Year Ended 31 December 2020 (continued)

Group Subsidiaries

There are three fellow subsidiaries of Vantage Infrastructure Holdings Limited. The Company at all times considers the impact of its decisions on these parties.

As a result of the above, the board has an overview of engagement with stakeholders which enables the directors to comply with their legal duty under s.172 of the Companies Act 2006.

Principal risks and uncertainties

The Company operates in a highly competitive market. The Company manages the risk of operating in such environments by offering competitive prices, providing value added services and maintaining strong relationships with its clients.

Vantage Enterprise Risk Management Framework

A key element of risk management in the Company is the Vantage Enterprise Risk Management Framework (the "Framework"). Its aim is to:

- identify and capture potential risks that may harm or disrupt the firm;
- monitor effectiveness of risk controls and processes; and
- facilitate a safe and well organised operating framework.

The scope of the Framework covers enterprise risk across all Vantage office locations; operational, administration and support activities; and core outsourced services.

COVID-19 risk

The ultimate economic fallout from the COVID-19 global pandemic, and the long-term impact on economies, markets, industries and individual companies are not yet known. The extent of the impact on the Vantage Group will depend on future developments which are highly uncertain. Vantage has however incorporated an assessment of the risks associated with COVID-19 and the potential for any other global pandemics in its Risk Assessment Plan based on known circumstances to date.

The Company has assessed that there are no material impacts on Assets Under Management, revenues and liquidity in the short to medium term. Impacts in the long term are less certain and dependent on local and global reactions and recovery times related to COVID-19 issues which are uncertain. The Company has assessed however, that the Company is sufficiently capitalised and has sufficient AUM and revenue to support and sustain operations in the long term based on current market conditions and current analysis of COVID-19 impacts.

The Company activated its Business Continuity Plans (BCP) in March 2020 in response to the guidance issued by the UK government and instructed all staff to work remotely to reduce social contact as far as possible and with the aim of enabling the Company to continue to operate safely. The Company continues to operate under its BCP and requests staff to continue working remotely as required by government guidelines. The Company has been able to continue to operate without any operational issues and no adverse financial impacts are expected as a result of working under the BCP until a safe and phased return to normal operations can occur.

Market risk

The Company is exposed to economic conditions which might affect its ability to execute on investment strategies. This risk is mitigated by operating in multiple jurisdictions and monitored by the Executive Committee, Risk Committee and via quarterly business updates to the Company Board of Directors.

Vantage Infrastructure (UK) Limited

Strategic Report for the Year Ended 31 December 2020 (continued)

Liquidity risk

The Company manages the risk of not being able to meet its obligations when they fall due by maintaining sufficient cash to meet its obligations at all times. The Company's liquidity position is managed by a centralised finance function with short-term and long-term funding projections which are constantly reviewed and monitored by the Executive Committee and the Company Board of Directors to ensure that all funding requirements are adequately covered.

Interest rate risk

The Company has no external borrowings hence the subsequent interest rate risk is considered immaterial. An increase in interest rates is unlikely to have an immediate and direct impact on the Company's performance. The Company has a loan to its immediate parent company which is interest-free and therefore has no interest rate risk.

Counterparty risk

The Company is exposed to the risk that counterparties will default on their contractual obligations to pay fees, resulting in a financial loss. The Directors believe that the size and quality of the Company's clients, together with strong client relationships and engagement, developed over a significant timeframe, mitigates this risk.

Foreign exchange risk

The Company has chosen GBP as its functional currency reflecting the fact that a substantial amount of the turnover is denominated in GBP. The Directors therefore believe that GBP should be the presentation currency. Transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction; the Company has decided not to hedge currency exposure. The Company manages foreign exchange risk centrally via its finance function in London.

Brexit risk

After the UK's formal departure from the European Union ("EU") on the 31 January 2020, a 'transition period' was agreed and in place to manage the exit with a cessation date of 31 December 2020. This enabled the UK to continue its financial services activities in the EU and access EU markets with the same rights and protections as it had done before the Brexit event.

Following the end of the transition period, the Temporary Permissions Regime implemented by the UK, effective on 1 January 2021 only applies in respect of 'inbound' firms and products into the UK. Although a Trade Cooperation Agreement ("TCA") is currently in place to cover the commercial and regulatory arrangements between the EU and the UK, it contains limited provisions on financial services and in particular, an omission on a decision on the UK's equivalence in this area, including the 'passporting' of marketing and advisory services. Under the TCA, UK firms will be able to provide services into an European Economic Area ("EEA") country, subject to compliance with local authorisation and licensing requirements. A declaration has been issued to agree a Memorandum of Understanding ("MOU"), setting down a framework for regulatory cooperation on financial services, as well as addressing the issue of equivalence.

The Company's Executive Committee and its Risk and Compliance function including the Risk Committee are responsible for assessing and managing the risks that have arisen due to Brexit and reporting to the Company Board. This group will continue to monitor the developments around the MOU and consider local marketing requirements as part of its strategy to market in the European jurisdictions as a Third Country Firm on an on-going basis. To date, steps taken to mitigate the loss of the marketing passport include the engagement with local third-party intermediaries, engagement with the Group owners' Alternative Investment Fund Manager domiciled in the Republic of Ireland and reliance on the comparatively more flexible rules in some countries around the status of pre-marketing of Funds.

Vantage Infrastructure (UK) Limited

Strategic Report for the Year Ended 31 December 2020 (continued)

Environmental, Social and Governance (ESG) matters

The Company aims to make informed and transparent investment decisions, which consider the environmental, social and governance risks of an investment, while ensuring appropriate reporting and risk management structures to mitigate and manage these risks for clients. Vantage's '360° ESG Strategic Framework' informs the Company's strategy and guides the Debt and Equity investment businesses to share best practices, run training programmes and to promote ESG in the infrastructure community, with the framework embraced both at manager and at the portfolio company level.

The Company uses its proprietary 'Active ESG Integration' approach, which spans the full lifecycle of an investment, for each of the Company's clients. The approach focuses on structured and rigorous ESG risk identification and assessment prior to making or recommending an investment, followed by regular monitoring and reviews of investments and active engagement in the asset management phase to identify issues, manage them and capture opportunities as they emerge.

ESG has been one of Vantage's strategic priorities since 2018. In the past three years, Vantage has enhanced its ESG strategy, innovated its client reporting, promoted ESG across its portfolio, implemented comprehensive ESG staff training and, through thought leadership, embedded a sustainability culture throughout the business. This programme of actions has resulted in pleasing results and industry award recognition.

In 2020, the business' commitment to ESG and sustainable investing continued to be acknowledged externally. For its second United Nations Principles for Responsible Investment (PRI) submission, Vantage was awarded the highest score of A+ for each of the categories relevant to the business: ESG Strategy & Governance, ESG Integration (Infrastructure Equity) and ESG Integration (Fixed Income). Vantage also maintained its GRESB 5-Star rating, achieving the Sector Leader designation for fund managers with Globally Diversified portfolios. All of its managed Equity portfolio companies also maintained their 5-Star ratings, with two of them being named Asset Sector Leaders in their respective categories.

As part of its efforts to improve transparency and communication on ESG and sustainability matters, Vantage will issue its second Sustainability Report in early 2021, highlighting its ESG achievements, and those of its portfolio companies, during the year, including the ESG initiatives that were progressed or completed, such as TCFD, EU Taxonomy and the external review of its ESG Framework.

In 2020 the Company also maintained its focus on diversity & inclusion (D&I), with training of Vantage staff, the publication of a thought leadership article, a project involving engagement with Equity portfolio companies on their D&I strategy and a continued review of Vantage's own diversity profile, which highlighted that the workforce continued to display strong diversity, with steady nationalities count year-on-year and a balanced representation of senior female and male staff.

During the COVID-19 pandemic, Vantage worked to ensure social and governance factors were considered from the outset. All Vantage employees were instructed to work from home during the initial lockdown period, with board and team meetings swiftly transitioned online and several social events held over video call to encourage continued staff morale. The London and New York offices reopened in the latter half of 2020 on a voluntary and safe basis, with social distancing and hygiene practices put in place. Vantage also engaged with and monitored all its portfolio companies to ensure that safety remained a priority, both for employees and the broader community. Portfolio companies enabled working from home for their staff as appropriate, in some cases requiring regulatory approval and the purchase of appropriate working equipment. For employees at portfolio companies providing essential services, including construction, maintenance or emergency work, or for employees in locations where social distancing could be exercised effectively, masks and sanitary kits were procured and social distancing protocols communicated, in order to protect staff, customers and the local communities.

Vantage Infrastructure (UK) Limited

Strategic Report for the Year Ended 31 December 2020 (continued)

Climate change and TCFD reporting

Vantage recognises that climate change is a critical global issue, affecting its potential and existing investments and their stakeholders, either directly through its physical impact or as a result of transition risk. The organisation acknowledges that asset managers, particularly in the infrastructure sector, can play a meaningful role in supporting the achievement of the goals of the Paris Agreement. As a sustainable infrastructure asset manager, Vantage is committed to assessing climate-related risks and opportunities, managing their implications and those arising from the energy transition, and driving positive climate mitigation and adaptation actions where possible.

Since early 2020, Vantage has been a formal supporter of the Task Force on Climate-related Financial Disclosures (TCFD). The Company has carried out several initiatives to embed the TCFD recommendations in the company's investment process and to progress the adoption of TCFD at the portfolio company level, thus championing the Task Force's critical work in driving transparent analysis and strategic ownership of climate-related investment risks and opportunities. The formal endorsement confirms that integrating climate change considerations into its practices is a pillar of Vantage's investment and asset management activities.

Following extensive research on the TCFD recommendations and their implications in terms of governance, strategy, risk management and reporting, and the steps existing clients were planning to take towards TCFD adoption, qualitative analysis has been carried out across the Equity portfolio highlighting the transition risks, physical risks and opportunities that climate change may present, with result, actions and next steps shared with clients as part of comprehensive ESG reports. For portfolio companies most exposed to climate change risks and opportunities, targeted quantitative analysis is being planned in line with the TCFD's and HM Treasury's indicative adoption roadmap for asset managers and for Vantage's investors. The requirement to evaluate the impact of various climate change scenarios is being embedded within certain managements' KPIs, in some instances to be carried out with the support of specialist climate change and/or ESG advisors. The Debt team continues to engage with its investee companies to encourage transparency of reporting in line with the TCFD recommendations and has been pleased to see increasing uptake from borrowers in considering the impacts of climate change and their willingness to report on this.

Vantage acknowledges that, as envisaged in the TCFD's own timetable, completing the implementation of the TCFD recommendations to the fullest extent will require further time and work, including on enhancing data collection and analysis to drive informed decisions.

Governance

As per Vantage's ESG and Sustainable Investment Policy, roles have been clearly defined across the firm's governance bodies and senior leaders, with all investment professionals accountable for climate-related considerations, within the broader ESG remit:

- **ESG leader:** A Senior Partner champions climate change analyses, initiatives and philosophy, and as a member of the Vantage Board, leads the Board's involvement in Vantage's ESG and climate change strategy, processes and senior decision-making accountability.
- **Board oversight:** The Vantage Board is responsible for overseeing the ESG strategy, connecting sustainability with corporate purpose, approving the ESG policy and monitoring its implementation, with climate change being a key component of this strategy. Vantage's Risk Committee, Executive Committee and Board are also responsible for identifying, assessing and managing risks to the business, including climate-related risks.
- **Investment Committees:** The Debt and Equity Investment Committees review and challenge any climate change assessments and their impact on investment decisions.
- **Investment teams:** The entire investment teams are responsible for identifying and managing ESG and climate change risks for new and existing investments and reporting them to the relevant committee.
- **ESG Working Group:** Debt and Equity representatives develop and improve ESG toolkits to ensure consistent implementation of climate change processes and TCFD action plans and track progress against the annual ESG action plans.

Vantage Infrastructure (UK) Limited

Strategic Report for the Year Ended 31 December 2020 (continued)

Strategy

Our strategic response to climate change includes the following actions for Vantage and its Equity and/or Debt businesses:

- **Engage with clients on climate change** - keep abreast of clients' requirements in terms of analysis and reporting.
- **Integrate climate-related considerations into investment decisions** - use ESG metrics and risk assessment tools developed in-house to systematically identify, assess and manage climate-related risks and opportunities, both in order to support or reject new investment opportunities and as part of the asset management of existing investments.
- **Actively engage with portfolio companies on climate change issues** - understand how they approach these issues and/or influence the development of climate change strategies, actively encouraging improvement over time through regular dialogue.
- **Encourage climate-related reporting by portfolio companies** - ensure climate-related risks are included within portfolio companies' risk registers, collect existing data and/or request information to support decision-making.
- **Perform climate-related risk assessments of portfolio companies** - work with portfolio companies to determine the materiality, risk to value/pricing and time horizon of climate-related risks and opportunities.
- **Promote TCFD adoption at investment level** - ensure climate-related risks and opportunities are incorporated or drive changes in governance, strategy, risk management systems and climate-related metrics and targets reporting.
- **Ensure management alignment** - include KPIs in management incentive plans to address climate-related issues and progress the implementation of TCFD recommendations, where possible and relevant.
- **Support climate mitigation/adaptation actions at investment level** - lead, invest and monitor carbon reduction and climate resilience improvement initiatives.
- **Improve transparency of climate-related issues** - report climate-related information and analyses to clients and Vantage's climate strategy in its Sustainability Report and accounts.
- **Review product development strategy in light of identified climate-related risks and opportunities** - target low carbon or climate resilient investments as part of new investment product offerings.

To assess sustainable Equity investments, Vantage has pro-actively embraced the EU Taxonomy guidelines by designing a methodology in-house and pilot programmes, which were both externally reviewed to confirm its approach and the robustness of its processes.

Vantage Infrastructure (UK) Limited

Strategic Report for the Year Ended 31 December 2020 (continued)

Risk management

Climate-related risks are integrated into Vantage's risk management processes (to manage risks to Vantage) and investment processes (to manage risks to portfolio investments, which may impact Vantage's clients and own business).

Vantage's risk management framework governs the firm's arrangements to monitor and assess the adequacy and effectiveness of its procedures, controls, risk management measures and actions. Those include regular updates and reviews by Vantage's Risk Committee and Board of risk management policies and its risk register, which ranks all identified risks by impact and likelihood.

Among Vantage's investment policies, its ESG and Sustainable Investment Policy describes how the firm integrates ESG considerations, including climate-related factors, into its investment processes.

Proprietary risk assessment frameworks have been developed by the Equity and Debt investment teams to consistently identify, evaluate and manage ESG factors at every stage of the investment process. 'Resilience to Climate Change' is one of the key environmental factors being assessed pre- and post-investment within these frameworks using our in-house tools.

The Equity team also carried out a climate-related risk assessment in line with TCFD guidance to analyse in more detail the materiality, risk and timeline of transition risks (policy and regulation/technology/market/reputation), physical risks (acute/chronic) and opportunities within the portfolios. The analysis can be performed on potential/existing investments and presented to the Equity Investment Committee and/or client(s). Where possible and material, scenario analyses are also run to assess and possibly quantify the financial and value implications of climate-related factors, although most portfolio companies are currently in the early stages of compiling comprehensive climate-based scenarios. Similarly, the Debt team stress tests the resiliency of relevant potential investments to energy transition risks using conservative Net Zero forecasts, with analysis again presented to its Debt Investment Committee and/or client(s).

During the asset management phase, Vantage encourages TCFD adoption at investment level to embed climate-related considerations into companies' risk management processes. For instance, the Equity team ensures climate-related risks are included in portfolio companies' own risk registers and has worked with management teams to ensure that the impact and likelihood of such risks are appropriately analysed and documented.

Metrics and targets

Vantage has been working with a number of its investee companies to ensure accurate metrics in relation to climate change are being reported and appropriate targets are being set. Metrics include energy usage, carbon emissions and savings, water usage and volumes of waste and recycling. Such metrics are typically set internally and presented to and discussed by the management and/or Boards of portfolio companies to ensure that targets are appropriately ambitious yet achievable and in order to hold accountability.

Approved by the Board on 22 April 2021 and signed on its behalf by:

Timothy Cable
Director

Vantage Infrastructure (UK) Limited

Directors' Report for the Year Ended 31 December 2020

The directors of Vantage Infrastructure (UK) Limited present their report and the financial statements for the year ended 31 December 2020.

Company information

The Company is a private company, incorporated and domiciled in the United Kingdom (UK). The address of its registered office is 2nd floor, 50 St. Mary Axe, London, EC3A 8FR, UK.

The Company was incorporated on 16 January 2006. The immediate parent entity of the Company is Vantage Infrastructure Holdings Limited, itself a subsidiary of Northill UK Management Holdings Limited.

Directors of the Company

The directors, who held office during the year and to the date of this report, were as follows:

Timothy Cable

Valeria Rosati

Catherine Jones

Jeremy Bassil (resigned 30 September 2020)

Darius Berendji (appointed 30 September 2020)

Principal activity

The principal activity of the Company is the provision of specialist investment management services, focused on debt and equity solutions within the infrastructure sector, to clients. Further information can be found in the Strategic Report. The Company is authorised and regulated by the Financial Conduct Authority to advise on investments.

Results and dividend

The Company recorded a profit of £397,188 in the year (2019: loss of £610,182). No dividends were paid during the year (2019: £nil).

Financial risk management

Information on the manner in which the Company manages financial risk is disclosed in Note 21 to the financial statements. In particular, the Company's exposure to credit risk, foreign exchange risk and liquidity risk are separately disclosed in that note.

Going concern

The financial statements have been prepared on a going concern basis. Further information on going concern can be found in Note 2.

Disclosure of information to the auditor

Each director has taken steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the Company's auditor is aware of that information. The directors confirm that there is no relevant information that they know of and of which they know the auditor is unaware.

Vantage Infrastructure (UK) Limited

Directors' Report for the Year Ended 31 December 2020 (continued)

Independent Auditor

The auditors Ernst & Young LLP are deemed to be reappointed under section 487(2) of the Companies Act 2006.

Approved by the Board on 22 April 2021 and signed on its behalf by:

.....
Timothy Cable
Director

Vantage Infrastructure (UK) Limited

Statement of Directors' Responsibilities

The directors acknowledge their responsibilities for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with International Accounting Standards in conformity with the requirements of the Companies Act 2006. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable International Accounting Standards in conformity with the requirements of the Companies Act 2006 have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Vantage Infrastructure (UK) Limited

Independent Auditor's Report to the Members of Vantage Infrastructure (UK) Limited

Opinion

We have audited the financial statements of Vantage Infrastructure (UK) Limited (the "company") for the period ended 31 December 2020, which comprise the Income Statement, Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Equity, Statement of Cash Flows, and the related notes 1 to 24, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and International Accounting Standards in conformity with the requirements of the Companies Act 2006.

In our opinion, the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2020 and of its profit for the year then ended;
- have been properly prepared in accordance with International Accounting Standards in conformity with the requirements of the Companies Act 2006; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern.

Vantage Infrastructure (UK) Limited

Independent Auditor's Report to the Members of Vantage Infrastructure (UK) Limited (continued)

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained with the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic Report and Directors' Report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic Report or the Directors' Report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities [set out on page 12], the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Vantage Infrastructure (UK) Limited

Independent Auditor's Report to the Members of Vantage Infrastructure (UK) Limited (continued)

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are those that relate to the reporting framework (International Accounting Standards in conformity with the requirement of Companies Act 2006 and the Companies Act 2006) and the relevant direct and indirect tax compliance regulation in the United Kingdom. In addition, the Company has to comply with relevant Financial Conduct Authority's (FCA) rules and regulations relating to its operations.
- We understood how the Company is complying with those frameworks by making enquiries of management and by seeking representation from those charged with governance. We corroborated our understanding by reviewing board meeting minutes and policy and procedures manuals. We also reviewed correspondence with relevant authorities.
- We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by considering the risk of management override and by designating revenue recognition as a fraud risk. We performed journal entry testing by specific risk criteria, with a focus on journals indicating large or unusual transactions based on our understanding of the business. We tested a sample of invoices issued to Funds managed by the Company by recalculating the amounts in the invoices and agreed the fee rate, any performance conditions and the managed Funds' Net Asset Values ('NAV') to Investment Management Agreements and NAV reports obtained from third-party administrator.
- Based on this understanding we designed our audit procedures to identify noncompliance with such laws and regulations. Our procedures involved enquiries of management and those charged with governance, review of legal and professional expenses, review of breaches and complaints register and review of board meeting minutes.
- The Company is a regulated investment manager under the supervision of the FCA. As such, the Senior statutory auditor reviewed the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Vantage Infrastructure (UK) Limited

Independent Auditor's Report to the Members of Vantage Infrastructure (UK) Limited (continued)

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020

1 General information

Vantage Infrastructure (UK) Limited is a private company limited by share capital, incorporated and domiciled in the United Kingdom under the Companies Act 2006. The address of its registered office is 2nd floor, 50 St. Mary Axe, London, EC3A 8FR, UK.

During the year the principal activity of the Company was to provide specialist investment management services with respect to infrastructure equity and infrastructure debt investments to clients.

2 Accounting policies

Statement of compliance

The Company financial statements have been prepared in accordance with International Accounting Standards in conformity with the requirements of the Companies Act 2006. IAS comprises standards and interpretations approved by the International Accounting Standards Board ("IASB").

Summary of significant accounting policies and key accounting estimates

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of preparation

The financial statements have been prepared on a going concern basis in accordance with IFRSs and under historical cost accounting rules.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies.

Going concern

The financial statements have been prepared on a going concern basis. There are no material uncertainties casting significant doubt on the entity's ability to continue as a going concern.

The ultimate economic fallout from the COVID-19 global pandemic, and the long-term impact on economies, markets, industries and individual companies are not yet known. The extent of the impact on the Company will depend on future developments which are highly uncertain. However, the Directors do not believe that there will be a significant impact on operations of the Company's ability to continue as a going concern.

The Directors have assessed that there are no material impacts on Assets Under Management, revenues and liquidity in the short to medium term. Impacts in the long term are less certain and dependent on local and global reactions and recovery times related to COVID-19 issues which are uncertain. The Directors have assessed however, that the Company is sufficiently capitalised and has sufficient AUM and revenue to support and sustain operations in the long term based on current market conditions and current analysis of COVID-19 impacts.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

The Company activated its Business Continuity Plans (BCP) in March 2020 in response to the guidance issued by the UK government and instructed all staff to work remotely to reduce social contact as far as possible and with the aim of enabling the Company to continue to operate safely. The Company continues to operate under its BCP and requests staff to continue working remotely where required by government guidelines. The Company has been able to continue to operate without any operational issues and no adverse financial impacts are expected as a result of working under the BCP until a safe and phased return to normal operations can occur.

The Directors, having reviewed the Company's financial forecasts and cashflow projections, believe the Company is well placed to remain a going concern for at least twelve months from the date of this report.

Changes in accounting policy

None of the standards, interpretations and amendments effective for the first time from 1 January 2020 have had a material effect on the financial statements.

None of the standards, interpretations and amendments which are effective for periods beginning after 1 January 2020 and which have not been adopted early, are expected to have a material effect on the financial statements.

Revenue recognition

Recognition

The Company earns revenue from the provision of services relating to infrastructure funds management.

The principles in IFRS are applied to revenue recognition criteria using the following 5 step model:

1. Identify the contracts with the customer
2. Identify the performance obligations in the contract
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations in the contract
5. Recognise revenue when or as the entity satisfies its performance obligations

(i) Fees

Management and service fees are recognised in the accounting period in which the respective services are rendered. Management fees represent fees earned by the Company for providing investment management services to individual account mandate clients in accordance with investment management agreements between the Company and the applicable individual account mandate client. Performance fees may also arise in accordance with investment management agreements; performance fees are recognised in the accounting period in which the performance fee is crystallised.

Service fees represent fees earned for providing investment advisory and asset management services and group corporate functions to Vantage USA, Vantage Asia and Vantage Australia in accordance with the Vantage Infrastructure Intragroup Services Agreement.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

(ii) Dividends and distributions

Dividends are recognised as revenue when the right to receive payment is established. Trust distributions are recognised on an entitlements basis.

(iii) Interest income

Interest income is recognised on a time proportion basis using the effective interest method. When a receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income.

Expenses

Expenses are recognised when the Company has a present obligation as a result of a past event that can be reliably measured. Expenses are recognised on an accruals basis and measured at fair value of the consideration paid or made payable. Expenses are recognised if expenditure does not produce future economic benefits that qualify for recognition in the Balance Sheet.

Placement agent fees

From time to time the Group may enter into exclusive placement agency agreements with providers who will seek to raise investor monies. Placement agency fees are directly attributable to, and are incremental costs associated with, the acquisition of committed investor monies which generate a future benefit for the Group in the form of on-going management fees.

Placement agency retainer fees

Retainer amounts paid to placement agents for the placement services a placement agent contractually commits to undertake are recognised as an “other asset” on the balance sheet until such time as the retainer amount is either:

- applied against gross placement fees levied by the placement agent upon the successful commitment by an investor or drawdown of investor capital (as applicable); or
- in the case of refundable retainers, until such time as the balance of the unutilised retainer amount is refunded by the placement agent at end of the contract period.

Where there is uncertainty as to whether placement agent fees will be generated against which non-refundable retainers that have been paid can be applied, the non-refundable retainer that is considered unlikely to be utilised is expensed immediately as an “other expense” in the profit and loss account. This scenario would apply where a fund is not expected to be established as anticipated and thus capital will not be committed or drawn from investors.

Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in pounds sterling, which is the Company's functional and presentation currency.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

(ii) Transactions and balances

Foreign currency transactions, being transactions in a currency other than the functional currency, are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Foreign exchange gains and losses that relate to borrowings are presented in the income statement, within finance costs. All other foreign exchange gains and losses are presented in the income statement on a net basis within revenue or operating expenses.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss.

Tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the Company operates and generates taxable income.

Deferred income tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements and on unused tax losses or tax credits in the Company. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary tax differences and losses.

Property, plant and equipment

Property, plant and equipment is stated in the statement of financial position at cost, less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

The cost of property, plant and equipment includes directly attributable incremental costs incurred in their acquisition and installation.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Depreciation

Depreciation is calculated on a straight line basis, net of an asset's residual value, over the estimated useful life of the asset, as follows:

Asset class	Depreciation method and rate
Furniture, fittings and equipment	2.5 - 20 years
Computer hardware and software	2.5 - 4 years

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

Leasehold improvements

2.5 - 20 years

Impairment of assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of its fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognised in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of comprehensive income unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Investments in subsidiaries

Investments in subsidiaries are recorded at fair value through profit or loss upon initial recognition. Costs incidental to the acquisition of subsidiaries are recognised in the profit or loss when incurred.

Purchases and sales of subsidiaries that require delivery within the time frame generally established by regulation or convention in the market place are recognised on the trade date, i.e. the date that the Company commits to purchase or sell the subsidiary.

After initial recognition, subsidiaries are measured at the lower of cost and recoverable amount. Any reduction to the recoverable amount is recognised as an impairment loss in the statements of comprehensive income.

Other financial assets

Other financial assets represent shares issued under the Vantage Long Term Incentive Plan. Refer to the Employee benefits accounting policy note for detail.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and call deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

Fund establishment costs

Recoverable fund establishment costs relate to fund set up related fees and costs paid by the Company that, in accordance with contractual arrangements, are recoverable by the Company from a proposed fund product offering for which the Company is to act as manager.

Recoverable fund establishment costs are recognised as an asset on the Company's balance sheet where it is anticipated that the fund product offering will successfully close (i.e. it is anticipated that the fund will be raised).

Where there is uncertainty as to whether fund establishment costs will be recovered, fund establishment costs are recognised in the profit and loss account as they are incurred. This scenario would apply where a fund product offering is not expected to be established as anticipated.

Trade receivables

Trade receivables are amounts due from customers for services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognised initially at the transaction price. They are subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for the impairment of trade receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables.

Trade payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognised initially at the transaction price and subsequently measured at amortised cost using the effective interest method.

Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the directors' best estimate of the expenditure required to settle the obligation at the reporting date and are discounted to present value where the effect is material.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

Leases

Definition

A lease is a contract, or a part of a contract, that conveys the right to use an asset or a physically distinct part of an asset ("the underlying asset") for a period of time in exchange for consideration. Further, the contract must convey the right to the company to control the asset or a physically distinct portion thereof. A contract is deemed to convey the right to control the underlying asset if, throughout the period of use, the company has the right to:

- Obtain substantially all the economic benefits from the use of the underlying asset, and;
- Direct the use of the underlying asset (eg direct how and for what purpose the asset is used)

Where contracts contain a lease coupled with an agreement to purchase or sell other goods or services (i.e., non-lease components), the non-lease components are identified and accounted for separately from the lease component. The consideration in the contract is allocated to the lease and non-lease components on a relative standalone price basis using the principles in IFRS15.

Initial recognition and measurement

The company initially recognises a lease liability for the obligation to make lease payments and a right-of-use asset for the right to use the underlying asset for the lease term.

The lease liability is measured at the present value of the lease payments to be made over the lease term. The lease payments include fixed payments, purchase options at exercise price (where payment is reasonably certain), expected amount of residual value guarantees, termination option penalties (where payment is considered reasonably certain) and variable lease payments that depend on an index or rate.

The right-of-use asset is initially measured at the amount of the lease liability, adjusted for lease prepayments, lease incentives received, the company's initial direct costs (e.g., commissions) and an estimate of restoration, removal and dismantling costs.

Subsequent measurement

After the commencement date, the company measures the lease liability by:

- (a) Increasing the carrying amount to reflect interest on the lease liability;
- (b) Reducing the carrying amount to reflect the lease payments made; and
- (c) Re-measuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised substance fixed lease payments or on the occurrence of other specific events.

Interest on the lease liability in each period during the lease term is the amount that produces a constant periodic rate of interest on the remaining balance of the lease liability. Interest charges are [presented separately as non-operating /included in finance cost] in the income statement, unless the costs are included in the carrying amount of another asset applying other applicable standards. Variable lease payments not included in the measurement of the lease liability, are included in operating expenses in the period in which the event or condition that triggers them arises.

The related right-of-use asset is accounted for using the Cost model in IAS 16 and depreciated and charged in accordance with the depreciation requirements of IAS 16 Property, Plant and Equipment as disclosed in the accounting policy for Property, Plant and Equipment. Adjustments are made to the carrying value of the right of use asset where the lease liability is re-measured in accordance with the above. Right of use assets are tested for impairment in accordance with IAS 36 Impairment of assets as disclosed in the accounting policy in impairment.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

Lease modifications

If a lease is modified, the modified contract is evaluated to determine whether it is or contains a lease. If a lease continues to exist, the lease modification will result in either a separate lease or a change in the accounting for the existing lease.

The modification is accounted for as a separate lease if both:

(a) The modification increases the scope of the lease by adding the right to use one or more underlying assets; and

(b) The consideration for the lease increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the particular contract.

If both of these conditions are met, the lease modification results in two separate leases, the unmodified original lease and a separate lease. The company then accounts for these in line with the accounting policy for new leases.

If either of the conditions are not met, the modified lease is not accounted for as a separate lease and the consideration is allocated to the contract and the lease liability is re-measured using the lease term of the modified lease and the discount rate as determined at the effective date of the modification.

For a modification that fully or partially decreases the scope of the lease (e.g., reduces the square footage of leased space), IFRS 16 requires a lessee to decrease the carrying amount of the right-of-use asset to reflect partial or full termination of the lease. Any difference between those adjustments is recognised in profit or loss at the effective date of the modification.

For all other lease modifications which are not accounted for as a separate lease, IFRS 16 requires the lessee to recognise the amount of the re-measurement of the lease liability as an adjustment to the corresponding right-of-use asset without affecting profit or loss.

Short term and low value leases

The company has made an accounting policy election, by class of underlying asset, not to recognise lease assets and lease liabilities for leases with a lease term of 12 months or less (i.e., short-term leases).

The company has made an accounting policy election on a lease-by-lease basis, not to recognise lease assets on leases for which the underlying asset is of low value.

Lease payments on short term and low value leases are accounted for on a straight line bases over the term of the lease or other systematic basis if considered more appropriate. Short term and low value lease payments are included in operating expenses in the income statements.

Sub leases

If an underlying asset is re-leased by the company to a third party and the company retains the primary obligation under the original lease, the transaction is deemed to be a sublease. The company continues to account for the original lease (the head lease) as a lessee and accounts for the sublease as a lessor (intermediate lessor). When the head lease is a short term lease, the sublease is classified as an operating lease. Otherwise, the sublease is classified using the classification criteria applicable to Lessor Accounting in IFRS 16 by reference to the right-of-use asset in the head lease (and not the underlying asset of the head lease).

After classification lessor accounting is applied to the sublease.

Share capital

Ordinary shares are classified as equity. Equity instruments are measured at the fair value of the cash or other resources received or receivable, net of the direct costs of issuing the equity instruments. If payment is deferred and the time value of money is material, the initial measurement is on a present value basis.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

Defined contribution pension obligation

A defined contribution plan is a pension plan under which fixed contributions are paid into a separate entity and has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

For defined contribution plans contributions are paid to publicly or privately administered pension insurance plans on a mandatory or contractual basis. The contributions are recognised as employee benefit expense when they are due. If contribution payments exceed the contribution due for service, the excess is recognised as an asset.

Employee benefits

Short term obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and short term bonus expected to be settled within 12 months after the end of the period in which the employees render the related service are recognised in respect of employee's services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

Other long-term obligations

The liability for annual leave and long term bonus which are not expected to be settled within 12 months after the end of the period in which the employees render the related service is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the end of the reporting period on corporate bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Share-based payments

i) Vantage Long Term Incentive Plan ("VLTIP")

Vantage Infrastructure Holdings Limited ("VIHL") and its subsidiaries ("the Group") operates a long-term incentive plan for certain employees of the Group, including employees of the Company, to better attract and retain key employees, and provide improved alignment between investor returns and growth in the equity value of the Group. The plan became effective on 28th February 2018 however the VLTIP will only apply on bonuses awarded from the year ending 31 December 2020. No VLTIP was issued to employees for the years ending 2018 and 2019.

Each eligible employee that receives a gross VLTIP amount will have any tax liabilities related to the gross VLTIP deducted by the Company. The net VLTIP amount for each eligible employee is applied to purchase Ordinary shares in VIHL. Where Ordinary shares are purchased for eligible employees, the Company accounts for the fair value of these Ordinary shares at the fair value at issue date. Future fair values will be based on an annual external valuation of the Group.

Any amounts paid in respect of the gross VLTIP, either in the form of purchase price paid for the Ordinary shares, or income tax and on-costs on the value of the gross VLTIP are initially recognised as a financial asset, and amortised over the vesting period of the shares. Where shares are issued at par value, the outstanding fair value of the shares is charged to the Statement of Comprehensive Income and credited to the share based payment reserve.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

2 Accounting policies (continued)

Termination benefits

Termination benefits are payable when employment is terminated before the normal retirement date, or when an employee is made redundant or accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits when it is demonstrably committed to either terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal or to providing termination benefits as a result of an offer made to encourage voluntary redundancy. All benefits are payable within 12 months of the reporting date.

Exemption from preparing group accounts

The financial statements contain information about Vantage Infrastructure (UK) Limited as an individual company and do not contain consolidated financial information as the parent of a group.

The Company is exempt under section 400 of the Companies Act 2006 from the requirement to prepare consolidated financial statements as it and its subsidiary undertakings are included by full consolidation in the consolidated financial statements of its parent, Vantage Infrastructure Holdings Limited, a company incorporated in United Kingdom.

3 Revenue

The analysis of the Company's revenue for the year from continuing operations is as follows:

	2020	2019
	£	£
Management fees	10,985,907	9,699,553
Service fees	-	330,000

Certain employees of the Company have been granted shares in VIHL. Shares were purchased from Northill UK Management Holdings Limited (Northill Management) or were newly issued shares. The funding for shares granted were based on a combination of pre-tax and post-tax awards for each employee.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

11 Other financial assets (continued)

The Company has recognised an asset for cash outflows incurred for the funding of the shares granted as follows:

- Purchase price cost for existing shares in VIHL from Northill Management; and
- Employee income tax liabilities and company on-costs for post-tax awards.

The asset is being amortised for a period between 24 and 36 months from date of issue, representing the vesting period of the shares granted. The amortisation expense is disclosed within the share-based payment expenses detailed in note 5, Staff Costs.

All trade and other payables are usually settled within 3 months.

18 Share-based payments

Vantage Long Term Incentive Plan

Certain employees have been granted shares for no consideration in VIHL. Where shares in VIHL were granted to employees for no consideration, the Company is recognising an expense representing the fair value of the shares issued at grant date over the 36 month vesting period for the shares granted.

The table below shows the number of shares granted for no consideration during the period:

Issue date	Notes	Outstanding 1 Jan 2019 No.	Issued during year No.	Released during period No.	Forfeited during period No.	Outstanding 31 Dec 2019 No.
22-Mar-2018	1	100,303	-	-	-	100,303
30-Apr-2018	2	40,701	-	-	-	40,701

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

18 Share-based payments (continued)

Notes

- (1) Shares vest on 19 March 2021. Fair value of shares at grant date was £9.79 per share and £20.16 at year-end.
(2) Shares were to vest on 30 April 2021 but accelerated to 19 March 2021. Fair value of shares at grant date was £9.79 per share and £20.16 at year-end.
(3) Shares vest on 1 April 2022. Fair value of shares at grant date was £19.32 per share and £20.16 at year-end.

Charge/credit arising from share-based payments

The total grant value of the shares granted at 31 December 2020 is £1,514,511 (2019 - £1,514,511) which is recognised over the vesting period for the shares granted. The period end expense is £504,851 (2019 - £493,653) and is disclosed as share based payments within note 5, Staff costs, and credited back to reserves within the Statement of Changes in Equity.

19 Commitments

Commitments for minimum lease payments in relation to operating leases are disclosed at Note 15.

The Company had no other outstanding commitments as 31 December 2020 or 31 December 2019.

20 Contingent assets and liabilities

The Company has paid a refundable deposit of £140,000 in relation to its premises. Northill UK Management Holdings Limited has also provided a Parent Company Guarantee for the payment of rent and all other sums due in relation to the lease of premises.

21 Financial risk management and impairment of financial assets

The Company's principal financial assets and liabilities comprise cash, other financial assets, trade receivables and trade payables, which arise directly from its operations.

The Company does not enter into or trade financial assets or liabilities for speculative purposes.

The main risks arising from the Company's financial assets and liabilities are interest rate risk, price risk, foreign exchange risk, credit risk, and liquidity risk. The Board reviews and agree policies for managing each of these risks.

(a) Market risk

(i) Interest rate risk

Interest rate risk is the risk that a financial asset or liability's value may fluctuate as a result of changes in market interest rates. Interest rate risk only affects cash and cash equivalents. The Company monitors cash and cash equivalents to maximise interest returns. The Company's loan to its immediate parent company is interest free and therefore has no interest rate risk. Refer to sensitivity analysis tables in this note.

(ii) Equity price risk

Price risk is the risk of fluctuation in unlisted security prices. The Company is not exposed to price risk with respect to its financial assets and therefore no sensitivity analysis has been conducted on these balances.

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

21 Financial risk management and impairment of financial assets (continued)

(iii) Foreign exchange risk

Foreign currency risk arises when future commercial transactions and recognised assets and liabilities are denominated in a currency that is not the Company's functional currency.

The Company has exposures to the US Dollar, Euro, Swiss Franc, Singapore Dollars and Australian Dollars. As a result, the Company's Balance Sheet and Statement of Comprehensive Income can be affected by movements in the respective foreign exchange rates. Refer to sensitivity analysis tables in this note.

(b) Credit risk and impairment

Credit risk represents the risk that a debtor will default on amounts owing to the Company or a counterparty to a financial instrument will fail to discharge an obligation and cause the Company to incur a financial loss.

With respect to credit risk arising from the financial assets of the Company the Company's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of the financial asset. Credit risk is minimised by the Company undertaking transactions only with creditworthy clients and financial institutions and the aggregate value of transactions are spread amongst those counterparties. In addition, receivable balances are monitored on an ongoing basis and delays in receipt escalated with counterparties and senior management.

The maximum exposure to credit risk, excluding the value of any collateral or other security, at the end of the reporting period to recognised financial assets is the carrying amount of those financial assets, net of any allowances for doubtful debts, as disclosed in the Balance Sheet and notes to the financial statements.

The Company's credit exposures are detailed in Note 12 - Trade and other receivables. The Directors believe there is negligible expected credit loss, and the contractual maturities of financial assets are set out below:

	Within 1 year	Between 1 and 5 years	After more than 5 years	Total
2020	£	£	£	£
Trade and other receivables	3,845,253	2,500,000	-	6,345,253
2019	£	£	£	£
Trade and other receivables	3,541,498	2,500,000	-	6,041,498

(c) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments.

To manage liquidity risk, the Company actively monitors cash balances and forecast liabilities on a regular basis. In addition to available cash on hand, the Company has forecast operational cash flows to assist in meeting forecast liabilities as and when they fall due.

The contractual maturities of financial liabilities are set out below:

Vantage Infrastructure (UK) Limited

Notes to the Financial Statements for the Year Ended 31 December 2020 (continued)

21 Financial risk management and impairment of financial assets (continued)

Maturity analysis

	Within 1 year	Between 1 and 5 years	After more than 5 years	Total

	£	£	£	£
2019				
Trade and other payables	2,129,153	-	-	2,129,153

(d) Summarised sensitivity analysis

The following tables summarise the sensitivity of financial assets and financial liabilities to interest rate risk, foreign exchange risk and other price risk.

The reasonable possible movements in the risk variables have been determined based on management's best estimate, having regard to a number of factors, including historical levels of changes in foreign exchange rates and interest rates. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of and/or correlation between performances of the economies and markets. As a result, historic variations in risk variables are not a definitive indicator of future variations in the risk variables

2020		Interest rate risk		Foreign exchange risk	
		-1.0%	1.0%	-10.0%	10.0%
