NOTES TO THE ABBREVIATED FINANCIAL STATEMENTS

For the year ended 30 June 2010

1 ACCOUNTING POLICIES

Basis of preparation of the financial statements

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

Turnover

Turnover represents amounts invoiced in respect of goods and services, net of value added tax

Depreciation

Depreciation is calculated to write down the cost of tangible fixed assets over their expected useful economic lives using the following rates

Plant and machinery	15% reducing balance
Motor vehicles	20% reducing balance

Stock and work in progress

Stock is valued at the lower of cost and net realisable value. In respect of finished goods and work in progress cost includes a relevant proportion of overheads according to the stage of completion. Net realisable value represents estimated selling price less costs required to sell. Provision is made for slow moving, obsolete or damaged stock where the net realisable value is less than cost.

Deferred taxation

Deferred taxation is provided on the liability method to take account of timing differences between the treatment of certain items for accounts purposes and their treatment for tax purposes on a full provision basis.

Cash flow statement

The company is exempt from the requirement to produce a cash flow statement as it qualifies as a small company under the Companies Act 2006.

Leasing and hire purchase commitments

Assets held under finance leases and hire purchase contracts, which are those where substantially all the risks and rewards of ownership of the asset have passed to the company, are capitalised in the balance sheet and depreciated over their useful lives. The corresponding lease or hire purchase obligation is treated in the balance sheet as a liability.

The interest element of the rental obligations is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding.

Rentals paid under operating leases are charged on a straight line basis over the lease term.

Goodwill

Goodwill is being written off in equal annual instalments over the directors estimate of its useful economic life of 10 years.
