# Notes to the financial statements for the year ended 31 December 2011

#### 1. Accounting policies

#### Authorisation

The financial statements of Google Payment Limited for the year ended 31 December 2011 were authorised for issue by the board of directors on\_\_\_\_\_

#### Basis of preparation of financial statements

The financial statements have been prepared on the going concern basis, under the historical cost convention and in accordance with the Companies Act 2006 and applicable United Kingdom accounting standards. The principal accounting policies, which have been applied consistently in the current year and previous financial period, are set out below.

#### Cash flow statement

The company is a wholly owned subsidiary of Google Inc, and is included in the consolidated financial statements of Google Inc, which are publicly available. Consequently, the company has taken advantage of the exemption from preparing a cash flow statement under the terms of FRS 1 (revised 1996) "Cash Flow Statements"

#### Cash

Cash comprises cash at banks and in hand less bank overdrafts

#### Foreign currencies

Monetary assets and liabilities denominated in foreign currencies are translated at the rates ruling at the balance sheet date and revenues, costs and non monetary assets at the exchange rates ruling at the transaction date. Profits and losses arising from foreign currency translations and on settlement of amounts receivable and payable in foreign currency are dealt with through the profit and loss account. Gains and losses for intercompany transactions and translations are borne by other group companies.

#### Revenue

The company provides payment processing services to its merchant base on which it charges a processing fee, and also earns revenue from a fellow group company for providing these services Revenue is recognised as earned. Cash and fee rebates ultimately paid to merchants under Google Checkout promotions, including cash paid to merchants as a result of discounts paid to consumers on certain transactions processed through Google Checkout, are accounted for as an offset to revenues.

#### **Taxation**

The charge for taxation is based on the profit for the year

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at the balance sheet date that result in an obligation to pay more tax or a right to pay less tax in the future. Timing differences are differences between profit as computed for taxation purposes and profit as stated in the financial statements which arise because certain items of income and expenditure in the financial statements are dealt with in different periods for taxation purposes.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

## Notes to the financial statements for the year ended 31 December 2011

Deferred tax is measured at the tax rates that are expected to apply in the periods in which the timing differences are expected to reverse based on tax rates and laws enacted or substantively enacted at the balance sheet date. Deferred tax is measured on a non discounted basis

#### Provisions for liabilities and charges

A provision is recognised when the company had a legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation. The effect of the time value of money is not material and therefore the provisions are not discounted

#### Allowances for transaction losses

The company is exposed to transaction losses arising from fraudulent consumer and merchant activity as well as non-performance by consumer or merchants of their Checkout obligations. An allowance for transaction losses is provided to cover anticipated losses resulting from these events

Allowances are recorded based on known facts and circumstances, historical experience and the mix of transaction types and are monitored and updated on a monthly basis. The charge for allowances for transaction losses is included within the profit and loss account in cost of sales and is included within provisions in the balance sheet at the year end. Allowances for transactions losses are not discounted

#### Funds receivable and funds payable

Funds receivable and payable arise due to the time taken to clear transactions through external payment networks. When consumers fund their account using their credit or debit card, there is a clearing period before the cash is received by Google Checkout. Such funds are treated as receivable until they are settled

When merchants request payment of funds, there is a clearing time between when Google Checkout triggers the funds disbursement, and the time funds are actually deducted from Google Checkout's bank accounts Such funds are treated as a funds payable until cash is removed from the company's bank accounts

#### E-Money outstanding

E-Money outstanding represents funds due to merchants for transactions that have been charged but for which the merchant has not requested payment

#### 2. **Turnover**

The total turnover of the company for the year has been derived from its principal activity
