GLOBAL RADIO UK LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2012

The Directors present their report and the financial statements of Global Radio UK Limited (the Group) and parent company (the Company) for the year ended 31 March 2012

PRINCIPAL ACTIVITIES

The Group's principal activity is that of a commercial radio licence holder and broadcaster in the United Kingdom. Other activities include the provision of services to the radio industry, the operation of entertainment-based internet sites and distribution of material related to each radio brand. The Group mainly traded during the year under the following radio brands: Heart, Capital, Classic FM, Choice, LBC, Gold and Xfm.

The Company is the holding company of the companies of the Group.

BUSINESS REVIEW

The year ended 31 March 2012 was another year of continuing progress for Global Radio. Adjusted EBITDA, as defined below, increased by 12.5% with the operating margin improving from 25.3% to 27.0%.

The further improvement in profitability has been achieved against a background of the continuing effects of the precarious financial situation in the Eurozone countries, the reduction in government spending and ongoing price inflation in the UK affecting consumer spending.

Against these many negative factors in the wider economic background, the Directors believe that the 6.6% growth we achieved in commercial revenues in the year to 31 March 2012 represents an excellent performance and outperformed the industry as a whole which grew by 5.9% in the same period (Source: Radio Advertising Bureau website). Our continuing growth is testament to the excellent commercial sales teams we employ across the Group. Their excellence was again recognised by their peers, where for the second year running, we won both the Media Week National Sales Team of the Year award and the Campaign Cross-Media Sales Team of the Year award.

Our programming teams also maintained their excellent work, with our average weekly listening hours of 167.8m hours, up 0.6% on the prior year's figure of 166.8m hours. Our share of overall radio listening increased from 15.9% to 16.0% in the year and Global Radio's stations now reach 19.3m adults in the UK every week (Source: Rajar).

Having successfully created the Heart network in 2009, we created the new Capital network in January 2011, and that move has been popular with our listeners in its first year since its creation, where we increased our weekly reach by 4.5% with 7.0m adults now tuning in each week (2011: 6.7m). The flagship station for the network, 95.8 Capital FM now reaches 2.27m adults in London every week, and has regained its position as the capital city's biggest commercial radio station (Source: Rajar). The creation of the Capital network also proved popular with our advertisers, with radio revenues up by 15% year on year.

On 19 March 2012 the Group acquired 100% of the share capital of Atlantic Broadcasting Limited, a radio station broadcasting in Cornwall.

Financial performance

The consolidated profit and loss account is set out on page 8 and shows that Global Radio's turnover for the year ended 31 March 2012 amounted to £209.4m (2011: £199.0m). Operating profit for the year ended 31 March 2012 amounted to £33.3m (2011: £21.2m). Operating profit is stated after charging depreciation of £5.2m (2011: £5.5m) and goodwill amortisation of £18.5m (2011: £19.8m).

The Directors consider that earnings before interest, tax, depreciation, amortisation, impairment provisions and redundancy, integration and property costs ("Adjusted EBITDA") is a key measure for the Group as it shows the underlying trading performance of the business. The pro forma results set out below show that the Group's commercial revenues increased by 6.6% in the year ended 31 March 2012 on a like-for-like basis, and, the

GLOBAL RADIO UK LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2012

Adjusted EBITDA for the year ended 31 March 2012 amounted to £56.6m, a 12.5% increase on the comparative figure for the year ended 31 March 2011 of £50.3m

	2012 £m	2011 £m
Commercial revenues	193.1	181.2
Other revenues	16.3	17.8
Total group turnover	209.4	199.0
Cost of sales	36.8	37.7
Gross profit	172.6	161.3
Operating costs (note 1)	116.0	111.0
Adjusted EBITDA (note 2)	56.6	50.3
	27.0 %	25.3 %

Note 1 Operating costs exclude depreciation, amortisation and restructuring/integration costs comprising redundancy and property costs

Note 2 Adjusted EBITDA comprises earnings before interest, tax, depreciation and amortisation and is stated before charging restructuring/integration costs comprising redundancy and property costs,

Under Financial Reporting Standard no 11 – Impairment of Assets and Goodwill, the Directors are required to consider the carrying value of goodwill where there has been an indicator that its value may have been impaired. The Directors consider there has been no indicator of impairment and therefore consider that the carrying value of goodwill at 31 March 2012 is not less than its recoverable amount.

Interest

The net financing costs for the year were £62.0m (2011: £55.5m) which includes rolled up interest on certain shareholder and connected party loan notes. Interest is made up of both bank interest and interest on loans to shareholders.

The terms of the bank loan are as follows:

Senior Term Loan - £80,000,000 (2011: £92,000,000) This has been shown in current liabilities as it fell due within less than one year. On 26 April 2012 the Group completed a refinancing of its previous £110,000,000 term loan banking facility with new reduced banking facilities comprising a new £65,000,000 term loan facility and £15,000,000 of working capital facilities (note 16). The proceeds of the new term loan facility were used with company cash resources to repay the outstanding amount of £80,000,000 on the previous term loan facility. The interest rate payable on the facilities is LIBOR plus a margin that is based on a ratchet, which depends on the EBITDA performance of the Group. The interest rate margin rate currently payable on the facility is lower than that the Group was paying under the previous facility. The new three-year facilities agreement has the ability to be extended to a five-year facility on the agreement of the Group and its lending banks.

The terms of the other loans are as follows:

Fixed rate loan notes - £85,043,000 (2011: £73,950,000) Repayable at par in June 2015. Bear interest at 15% per annum. The loan notes are listed on the Channel Island Stock Exchange ("CISX") and held by the Group's ultimate holding company.

Shareholder loan notes - £147,886,000 (2011: £128,597,000) Repayable at par in June 2016. Bear interest at 15% per annum. The loan notes are listed on the CISX and held by the Group's ultimate holding company.

GLOBAL RADIO UK LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2012

PRINCIPAL RISKS AND UNCERTAINTIES

The business uses key performance indicators which are monitored on a regular basis and include audience trends such as weekly reach, listening hours, share of the market and demographic mix, as well as financial indicators such as turnover, Adjusted EBITDA and operating margins. Variance analysis is performed monthly and variances are monitored and discussed within a formal meeting structure.

The risks are monitored and managed at a Group level and by local management teams. The principal risks faced by the business can be divided into operational, commercial, financial and credit risks.

Operational Audience levels at the Group's stations could erode the Group's position, both in local markets and in the national marketplace if they were to decline. To address this, the Group markets its radio brands regularly and continually strives to improve programming standards to increase audiences. The Group carries out research on its listeners, building profiles of their likes and dislikes, and uses this to develop both the sound of the stations, and the music they play.

Commercial There is a risk that a continued weakness in the advertising market could put pressure on traditional revenue streams. To address this, the Group has been developing its relationship with advertisers and agencies to ensure that the value of its brands is fully realised. This includes offering tailored solutions to advertisers and highlighting the breadth of our products. The development of new media opportunities is at the heart of the Group's strategy, which over time will reduce the pressure on our traditional revenue generators.

Financial risks As noted above, the Group is primarily funded by debt. Bank debt has been reduced significantly in the year. The Group's operations are cash-generative, and a general exposure to liquidity risk is considered to be low.

Credit risk The Group actively mitigates the risk of payment default by its customers by the use of trade credit insurance and by reviewing outstanding payments and provisions for payment default regularly.

FINANCIAL INSTRUMENTS

The Group's risk management process and the policies for mitigating certain type of risks are set out in note 35. Details of the financial instruments used for these purposes are in note 35 to the consolidated financial statements.

COMPANY'S POLICY FOR PAYMENT OF CREDITORS

Community involvement is a mainstay of the Group's radio operations and the Group considers that this extends equally to its position in the business community. The Group does not follow a code but operates a payment policy to agreed terms in settling outstanding debts. For certain types of regular contracted services, the Group encourages direct debit or standing order arrangements. Most other supplies are on an ad hoc basis and the terms of payment are agreed when the order is placed. The majority of payments are made by electronic transfer direct to suppliers' bank accounts. The Company had no trade creditors at the year end (2012 and 2011: creditor days - nil).

EMPLOYEE INVOLVEMENT

The Group places considerable value on the involvement of its employees and has continued its previous practice of ensuring effective two-way communication on matters affecting them as employees and on the various factors affecting the performance of the Group. This is achieved through formal meetings and the Group intranet. Employees are consulted monthly on a wide range of matters affecting their current and future interests.

Applications for employment by disabled persons are always fully considered, bearing in mind the respective aptitudes and abilities of the applicants concerned. In the event of members of staff becoming disabled, every effort is made to ensure that their employment with the Group continues and that appropriate training is arranged. It is the policy of the Group that the training, career development and promotion of disabled persons should, as far as possible, be identical with that of other employees.

QUALIFYING THIRD PARTY INDEMNITY PROVISIONS

The Directors benefit from qualifying third party indemnity provisions in place. The Group also provided qualifying third party indemnity provisions to certain directors of associated companies during the financial year.

Revenue for the production of advertisements is recognised on the date of release to the client. Enterprise revenue relating to events is recognised upon agreed settlement with all related parties and CD revenue is recognised on date of sale. Revenue on barter transactions is recognised only when the goods or services being exchanged are of a dissimilar nature.

1.5 Intangible fixed assets and amortisation

Goodwill is the difference between amounts paid on the acquisition of a business and the fair value of the identifiable assets and liabilities. It is amortised to the profit and loss account over its estimated economic life.

The Directors consider each acquisition separately for the purpose of determining the amortisation period of any goodwill that arises. The goodwill is being amortised over a period of twenty years, being the Directors' best estimate of its useful economic life. This largely equates to the remaining life of the Group's radio licence portfolio and assumes that the Group successfully renews each licence for a further term.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2012

1 ACCOUNTING POLICIES (continued)

1.6 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives on the following bases:

Freehold property	-	2%-4% per annum straight-line
Long-term leasehold property	-	2%-6% per annum straight-line
Short-term leasehold property	-	over term of lease or, where lease is renewable, 5% per annum
Fixtures and technical equipment	-	10%-33% per annum straight-line
Transmitters	-	5% per annum straight-line

Land is not depreciated

1.7 Investments

- (i) **Subsidiary undertakings**
Investments in subsidiaries are valued at cost less provision for impairment
- (ii) **Associated undertakings**
Investments in associates are stated at the amount of the Group's share of net assets. The profit and loss account includes the Group's share of the associated companies' profits or losses after taxation using the equity accounting basis
- (iii) **Other investments**
Investments held as fixed assets are shown at cost less provision for impairment

1.8 Leasing and hire purchase

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible fixed assets. Assets acquired by finance lease are depreciated over the shorter of the lease term and their useful lives. Assets acquired by hire purchase are depreciated over their useful lives. Finance leases are those where substantially all of the benefits and risks of ownership are assumed by the Company. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce a constant periodic rate of charge on the net obligation outstanding in each period.

1.9 Operating leases

Rentals under operating leases are charged to the profit and loss account on a straight-line basis over the lease term.

Benefits received and receivable as an incentive to sign an operating lease are recognised on a straight-line basis over the period until the date the rent is expected to be adjusted to the prevailing market rate.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2012

1 ACCOUNTING POLICIES (continued)

1.10 Post retirement benefits

The Group operates a defined contribution pension scheme and the pension charge represents the amounts payable by the Group to the fund in respect of the year

The Group also operates two defined benefit pension schemes and the pension charge is based on full actuarial valuations dated 30 September 2008

Pension scheme assets are measured using market values. For quoted securities the current bid price is taken as market value. Pension scheme liabilities are measured using a projected unit method and discounted at the current rate of return on a high quality corporate bond of equivalent term and currency to the liability.

The pension scheme surplus (to the extent that it is recoverable) or deficit is recognised in full. The movement in the scheme surplus/deficit is split between administrative expenses, other finance income and actuarial gains and losses in the consolidated statement of total recognised gains and losses.

1.11 Related party transactions

The Company has taken advantage of the exemption contained in FRS 8 and has therefore not disclosed transactions or balances with entities which form part of the Group (or investees of the Group qualifying as related parties).

1.12 Interest bearing borrowings

Immediately after issue, debt is stated at the fair value of the consideration received on the issue of the capital instrument after deduction of issue costs. The finance cost of the debt is allocated to periods over the term of the debt at a constant rate on the carrying amount.

1.13 Share based payments

On 21 February 2011, a number of employees acquired B ordinary shares in Global Radio Holdings Limited (GRHL), a subsidiary of the Company. These B shares are subject to rights whereby the employees may sell the shares to GRHL or GRHL may acquire the shares from the employees for cash within a 60 day window starting on 1 August 2014, 31 August 2015 and 31 August 2016 respectively. The value at which the shares can be bought or sold is determined by a formula based on the future growth in value of the shares over a certain minimum threshold value. Under FRS 20 - Share based payments, the liability arising has been treated as a cash settled share based payment transaction. The fair value is initially measured at grant date and spread over the period during which the employees become unconditionally entitled to payment.

The liability is revalued at each balance sheet date and settlement date with any changes to fair value being recognised in the profit and loss account.

Factors affecting tax credit for the year

The tax assessed for the year is higher than (2011 - *higher than*) the standard rate of corporation tax in the UK of 26% (2011 - 28%). The differences are explained below

	2012 £000	2011 £000

	<u>(257)</u>	<u>(786)</u>
Current tax credit for the year (see above)	<u>(257)</u>	<u>(786)</u>

Factors that may affect future tax (credits)/charges

On 21 March 2012 the Chancellor announced the reduction in the main rate of UK corporation tax to 24 per cent with effect from 1 April 2012. This change became substantively enacted on 26 March 2012 and therefore the effect of the rate reduction creates a reduction in the deferred tax asset which has been included in the figures in note 17. The Chancellor also proposed changes to further reduce the main rate of corporation tax by one per cent per annum to 22 per cent by 1 April 2014, but these changes have not yet been substantively enacted and therefore are not included in the figures above. The impact of the future rate reductions will be accounted for to the extent that they are enacted at the balance sheet date, however it is estimated that this will not have a material effect on the Group or the Company.

All current employees are eligible to join the Global Radio Group Personal Pension Plan, which new employees are invited to join when they begin employment with the Group. This scheme is a contributory defined contribution arrangement and as at 31 March 2012, 451 (2011 426) employees were active members of this scheme. The Group makes age-related contributions to the scheme.

The pension cost charge for the period represents contributions payable by the Group to the scheme and amounted to £973,000 (2011 £851,000).

Contributions amounting to £161,000 (2011 £133,000) were payable to the scheme at the end of the financial year and are included in other creditors.

The Group operates two defined benefit pension schemes.

The actual return on scheme assets over the period from 31 March 2011 to 31 March 2012 was £1,027,000 for MRGPS and £753,000 for CRPPAS (period from 31 March 2010 to 31 March 2011 was £990,000 and £1,013,000 respectively).

The expected long-term rate of return on assets assumption is assessed by considering the current level of returns on risk-free investments (primarily government bonds) and the expectations for the risk premium of each asset class. The expected return for each asset class is then weighted based on the asset allocation to develop the expected long-term rate of return on assets assumption for the portfolio.

32 SHARE BASED PAYMENTS

The Group operates a cash-settled share-based payment arrangement as follows

The Growth Shares Scheme ("the Scheme")

The Scheme allows certain Group directors to acquire shares in Global Radio Holdings Limited (GRHL), a subsidiary of the Company, to share in the growth of this company

To participate, in February 2011, the directors were required to subscribe to B ordinary shares in GRHL - "Growth Shares". These Growth Shares will only participate in the growth in value of GRHL above a certain threshold. The shares provide directors with an interest in the growth of the business beyond that threshold.

The number of shares issued in 2011 and outstanding at 31 March 2012 and 2011 is 69,000.

At the date of subscription, a calculation is made of the value of the business based on its EBITDA and using a valuation multiple based on a group of comparator companies. The Growth Shares only have the right to participate in capital value to the extent that a threshold set at 30% above this valuation (the "Threshold Value") is exceeded. The Growth Shares allow the directors to participate in a proportion of the capital value created above the Threshold Value.

The Growth Shares can be sold by the directors on the earlier of an external exit or during a 60-day window from 1 August 2014 and on each subsequent anniversary until 2016.

The EBITDA used to determine the value of the Growth Shares will be the EBITDA for the year ended immediately before the date of disposal.

Share-based payment expense

The charge recognised in the profit and loss account in respect of the Scheme was £1,476,000 (2011 £Nil).

Share-based payment liability

The Scheme requires the Group to pay the intrinsic value of these share-based payments to the employee at the date of exercise. The liability is re-valued at each balance sheet date and settlement date with any changes to fair value being recognised in the profit and loss account. The Group has recorded liabilities in respect of unvested grants of £1,476,000 (2011 £Nil).

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2012

35 FINANCIAL INSTRUMENTS

The Group's principal financial instruments, which exclude short-term debtors and creditors as permitted by FRS 13 'Derivatives and other financial instruments disclosures', comprise loans, listed loan notes, and cash. These listed loan notes are registered on the Channel Islands Stock Exchange ("CISX") and are all held by the ultimate parent company, Global Radio Group Limited (Jersey).

It is, and has been throughout the year under review, the Group's policy that no trading in financial instruments shall be undertaken.

The main risks arising from the Group's financial instruments are interest rate risk and liquidity risk. The Group does not operate in overseas territories and therefore has no currency risk. Senior management review and agree policies for managing each of the following principal risks.

Interest rate risk

The Group borrows at both fixed and floating rates of interest. In the current economic climate, where the Bank of England base rate and LIBOR are both at historic low points and have remained at such low levels for a number of months, the Directors do not believe that a clear economic benefit does exist for the use of interest rate hedge instruments to fix floating rate liabilities, because fixed rates are significantly higher than prevailing floating rates and would significantly increase the Group's annual interest expense. The Directors continue to monitor this position closely.

(a) Financial liabilities

Financial liabilities are principally bank loans and loan notes and are all denominated in sterling.

The total financial liabilities for the Group were £787,404,000 (2011 £739,801,000).

The interest rate risk profile of financial liabilities as at 31 March 2012 and 31 March 2011 are as follows:
Fixed rate liabilities totalled £294,356,000 (2011 £416,303,000). Floating rate liabilities totalled £493,048,000 (2011 £323,498,000).

Fixed rate financial liabilities represent 60% of the total financial liabilities of the Group as at 31 March 2012 (2011 56%).

The floating rate liabilities are linked to interest rates related to LIBOR.

The weighted average interest rate for the fixed rate financial liabilities as at 31 March 2012 was 8.1% (2011 7.4%). The weighted average period for which the rates are fixed is 43 months (2011 56 months).

b) Financial assets

Floating rate financial assets comprise cash deposits. The value of financial assets as at 31 March 2012 was £90,467,000 (2011 £61,632,000).

GLOBAL RADIO UK LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2012

Liquidity risk

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans and loan notes. Short-term flexibility is achieved by working capital facilities if required.

The maturity profile of the Group's interest-bearing financial liabilities, excluding accrued interest, is set out below.

	2012 £000	2011 £000
In one year or less, or on demand	80,000	12,000
Between one and two years	-	80,000
Between two and five years	707,404	73,950
In five years or more	-	559,629
	<u>787,404</u>	<u>725,579</u>

The maturity profile indicates that 90% of the Group's borrowings are repayable after more than one year.

The Group has various borrowing facilities available to it. As at 31 March 2012 there were un-drawn working capital banking facilities available totalling £15,000,000 (2011: £15,000,000). These borrowing facilities are reviewed in October each year by the Group's banks.

Fair value of financial instruments

The carrying amounts and fair values of the material financial instruments are as follows:

	2012 carrying amount £000	2012 fair value £000	2011 carrying amount £000	2011 fair value £000
Cash	90,467	90,467	61,632	61,632
Borrowings	-	-	-	-
Short-term loans	80,000	80,000	-	-
Long-term loans	707,404	707,404	725,579	725,579

The Group, in estimating its fair value disclosures for financial instruments, has used the following methods and assumptions:

Cash The carrying values reported approximate fair value because of its short maturity.

Long-term loans The Directors consider that it is not practicable to estimate the fair value of the Group's long-term borrowings as there is no active market for these instruments and the Group's liquidity risk makes fair values calculated on a net present value basis unreliable. However, due to the nature of the terms of the long-term borrowings, the face value of these loans is equal to their fair market value.
