### 1 Accounting policies

The abbreviated accounts have been prepared under the historical cost convention

The following principal accounting policies have been applied

#### *Turnover*

Turnover represents sales to external customers at invoiced amounts less value added tax or local taxes on sales. All income is recognised in the period in which goods are delivered or the service is provided.

#### *Depreciation*

Depreciation is provided to write off the cost, less estimated residual values, of all tangible fixed assets, evenly over their expected useful lives. It is calculated at the following rates:

Motor vehicles	- 25% straight line basis
Cleaning equipment	- over 2 years

#### *Impairment of fixed assets and goodwill*

The need for any fixed asset impairment write-down is assessed by comparison of the carrying value of the asset against the higher of realisable value and value in use.

#### *Leased assets*

Where assets are financed by leasing agreements that give rights approximating to ownership (finance leases), the assets are treated as if they had been purchased outright. The amount capitalised is the present value of the minimum lease payments payable over the term of the lease. The corresponding leasing commitments are shown as amounts payable to the lessor. Depreciation on the relevant assets is charged to the profit and loss account over the shorter of estimated useful economic life and the period of the lease.

Lease payments are analysed between capital and interest components so that the interest element of the payment is charged to the profit and loss account over the period of the lease and is calculated so that it represents a constant proportion of the balance of capital repayments outstanding. The capital part reduces the amounts payable to the lessor.

All other leases are treated as operating leases. Their annual rentals are charged to the profit and loss account on a straight-line basis over the term of the lease.

#### *Going concern*

These accounts have been prepared on a going concern basis even though the balance sheet shows a negative position of £96,252 at the year end. In producing the accounts on this basis, we have assumed the continuing support of the company's creditors and bankers.
