2 Summary of significant accounting policies

Basis of preparation

The accounts have been prepared in accordance with applicable accounting standards including Section 1A of Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (FRS102) and the Companies Act 2006. The accounts have been prepared on a going concern basis under the historical cost convention modified, if appropriate, to include certain items at fair value. The presentation currency is £ sterling.

The significant accounting policies applied in the preparation of these accounts are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

Turnover

Turnover is measured at fair value of the consideration received or receivable, net of discounts and value added tax. Turnover includes revenue earned from the rendering of services.

Turnover from the rendering of services is recognised by reference to the stage of completion of the contract. The stage of completion of a contract is measured by comparing the costs incurred for work performed to date to the total estimated contract costs. If at the balance sheet date completion of the contract is dependent on external factors, then the revenue is recognised only when the event occurs. In such cases direct costs incurred up to the balance sheet date plus an overhead rate are recognised as revenue to the extent that they are recoverable.

Taxation

The tax expense for the period comprises current tax. Tax is recognised in profit or loss, except that a charge attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

Current tax is recognised for the amount of corporation tax payable in respect of the taxable profit for the year using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Tangible fixed assets

Tangible fixed assets are measured at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation

Depreciation is calculated to write down the cost less estimated residual value of all tangible fixed assets over their expected useful lives. The annual rates and methods of depreciation are as follows:-

Asset class	Depreciation method and rate
Office equipment	33.33% straight line basis

Debtors

Short term debtors are measured at transaction price, less any impairment.

Cash at bank and in hand

Cash at bank and in hand comprises cash on hand and call deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of change in value.

Creditors

Short term creditors are measured at transaction price.

3 Employees
