Notes to the abbreviated financial statements for the year ended 31 October 2013

1. Accounting policies

1.1. Accounting convention

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

1.2. Turnover

Turnover represents the total sales value, excluding value added tax, of services supplied during the year

1.3. Tangible fixed assets and depreciation

Depreciation is provided at rates calculated to write off the cost less residual value of each asset over its expected useful life, as follows

Computer equipment - 33% straight line

1.4. Pensions

The pension costs charged in the financial statements represent the contribution payable by the company during the year

1.5. Deferred taxation

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different from those in which they are included in the company's accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more (or less) tax at a future date. A net deferred tax asset is regarded as recoverable and therefore recognised only to the extent that, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable profits from which the future reversal of the underlying timing difference can be deducted. Deferred tax is measured at the average tax rates that are expected to apply when the timing differences reverse, based on current tax law and rates. Deferred tax assets and liabilities are not discounted.
