**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2019**

1. STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" including the provisions of Section 1A "Small Entities" and the Companies Act 2006.

2. ACCOUNTING POLICIES

Basis of preparing the financial statements

The financial statements have been prepared under the historical cost convention.

The financial statements have been prepared on the going concern basis which assumes that the company's financial backer will provide continued support. The directors have prepared projected cash flow information for the year ending 12 months from the date of signature on the balance sheet which forms the basis of the future financing requirements.

The financial backer has confirmed their continuing support to the company, in particular they have confirmed that the amounts owed from the company will not be recalled until sufficient funds are available and consider it appropriate to disclose the amounts due as longer term liabilities. The directors therefore consider it appropriate to prepare the financial statements on the going concern basis.

Preparation of consolidated financial statements

The financial statements contain information about Clear View Assured Limited as an individual company and do not contain consolidated financial information as the parent of a group. The company is exempt under Section 399(2A) of the Companies Act 2006 from the requirements to prepare consolidated financial statements.

Significant judgements and estimates

Investments in non-cumulative redeemable preference shares have been classed within debtors falling due after more than one year rather than as a fixed asset investment as there is a set redemption date.

The investment in non-cumulative redeemable preference shares has been measured at fair value. The discounted cash flow analysis valuation technique has been applied to calculate the fair value. The discount factor has been based on rates paid on similar debt instruments in prior periods.

Key accounting estimates and assumptions

Accounting estimates, by definition, will often vary from the actual results. They are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The nature of the estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

Long term credit arrangements

The effective interest method is used to measure long term credit arrangements. The financial asset or liability is measured at the present value of future payments discounted at an estimate of a market rate of interest. The market rate of interest is based on rates paid on similar debt instruments in prior periods.

Useful economic lives of intangible assets

The annual amortisation charge for intangible assets is sensitive to changes in the estimated useful economic lives and residual values of the assets, which are re-assessed annually. They are amended when necessary to reflect current estimates based on future income generation.

**NOTES TO THE FINANCIAL STATEMENTS - continued
FOR THE YEAR ENDED 31 DECEMBER 2019**

2. ACCOUNTING POLICIES - continued

Intangible assets and deferred consideration

The cost of intangible assets includes the estimated additional amounts to be paid, based on expected future income generations of the financial adviser practices acquired. The cost of intangible assets and the related deferred consideration may be subject to changes arising from the differences between the original estimates of additional amounts to be paid and the actual amounts due, along with the updating of the estimates of future income generation.

Turnover

Turnover is measured at the fair value of the consideration received or receivable, net of discounts and value added taxes. All of the turnover is generated from the rendering of services.

Intangible assets

Intangible assets are the amounts paid together with the estimated additional amounts to be paid, based on expected future income generation, in connection with the acquisition of clients from retiring financial adviser practices.

Intangible assets are written off in equal annual instalments over the estimated useful economic life of 8 years, which is the estimated period over which benefits are expected to accrue to the company.

Investments in subsidiaries

Investments in shares in subsidiary undertakings are recognised at cost.

Non-cumulative redeemable preference shares held have been measured at fair value using the discounted cash flow analysis valuation technique. The difference between the fair value of the shares and amount ultimately repayable is treated as an investment in subsidiary undertakings.

Loans made to subsidiaries are valued using the effective interest method. The difference between the present value of the loan and the amount ultimately repayable is treated as an investment in subsidiary undertakings.

Financial instruments

The company has chosen to adopt Section 11 of FRS 102 in respect of financial instruments.

Short term debtors are measured at transaction price, less any impairment.

Short term creditors are measured at the transaction price.

Other financial assets and liabilities, including long term credit arrangements, are measured initially at transaction price, net of transaction costs, and are measured subsequently at amortised cost using the effective interest method.

Statutory information

The company is a private company limited by shares and is incorporated in England and Wales, company registration number 08022316. The address of its registered office is 5th Floor, 30 Market Street, Huddersfield, HD1 2HG.
