3. ACCOUNTING POLICIES

Summary of significant accounting policies

The principle accounting policies applied in the preparation of these financial statements are set out below.

These policies have been consistently applied to all years presented, unless otherwise stated.

Basis of preparation

The financial statements are prepared on the going concern basis under the historical cost convention and comply with the United Kingdom Accounting Standards and Companies Act 2006.

Going concern

No other material uncertainties that may cast significant doubt about the ability of the company to continue as a going concern have been identified by the director.

On this basis the director considers it appropriate to prepare the financial statements on the going concern basis.

Revenue recognition

Turnover is measured at the fair value of the consideration received or receivable and represents amounts receivable for services rendered, stated net of discounts and of Value Added Tax.

Income is recognised when services have been rendered to customers such that risks and rewards of ownership have transferred to them.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Fixtures and fittings	- 25% on reducing balance
Computer equipment	- 33.33% on cost

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Income Statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the statement of financial position date.

for the year ended 31 May 2018

3. ACCOUNTING POLICIES - continued

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the statement of financial position date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.
