STRATEGIC REPORT

YEAR ENDED 5th APRIL 2015

PRINCIPAL ACTIVITIES

The principal activity in the period under review is the provision of services in the biofuel industry through investment in a limited liability partnership.

BUSINESS REVIEW

During the previous year the company acquired a partnership interest of £7,036,578 in Elysian Fuels 24 LLP. The LLP has been engaged to provide both consultancy and technical services in relation to the design, establishment and operation of a bio-ethanol plant near Grimsby. The LLP generates its returns through contingent payments linked to the commercial success of the Grimsby site, as well as the Ethanol plant in Hopewell, Virginia – both owned by the Future Fuels LLP – together with annual project referral fees. The Company receives that income generated from the contingent payments only. The investment in the LLP was made with the expectation that a loss would be made in the first period of trading and that no income was expected from the investment at this time.

Subsequent to the date the investment was made the global crude oil price has dropped considerably by more than 50% and appears likely to stay at the current low levels for the foreseeable future. This has had a significant knock on effect on the bio fuel industry as Ethanol has become a less attractive blend for gasoline, with Ethanol prices dropping by over 30%. In light of these significant changes in the global market conditions which affect the business of the LLP, the directors have re-evaluated the expected returns the company is likely to generate from its investment in the LLP. Taking into account the most recent cash flow forecasts of the LLP and the PLC's likely share of future profits, the directors have assessed that at 5th April 2015, it is now more likely than not, that the PLC will not receive a return on its original investment. In accordance with Financial Reporting Standard 11 'Impairment of Fixed Assets and Goodwill' and the concept of prudence, the directors have fully impaired the value of the investment within these financial statements.

PRINCIPAL RISKS AND UNCERTAINTIES

The principal risk associated with the Company is the failure of the LLP to perform its obligations described above and therefore provide no return on investment for the Company.

FUTURE PERFORMANCE

The nature of the Company as a member of an LLP means future performance is reliant on the success of the LLP as no further investment is currently proposed.

NOTES TO THE FINANCIAL STATEMENTS

YEAR ENDED 5th APRIL 2015

1. ACCOUNTING POLICIES

Basis of accounting

The financial statements have been prepared under the historical cost convention and in accordance with applicable accounting standards.

Going concern

The Directors, having made appropriate enquiries, consider that adequate resources exist to continue in operational existence for the foreseeable future and that, therefore, it is appropriate to adopt the going concern basis in preparing the financial statements for the period ended 5th April 2015.

Deferred taxation

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable tax profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax assets and liabilities are calculated at the tax rates expected to be effective at the time the timing differences are expected to reverse.

Deferred tax assets and liabilities are discounted.

Investments

Investments held as fixed assets are shown at cost less provision for impairment. The directors undertake an impairment review annually in order to establish whether there are any indications of a fall in value. In doing so, various factors are taken into account including economic, future expected performance and market conditions.

Any necessary provision in a given period is charged to the profit and loss in that year.

5. INVESTMENTS (continued)

Participating interests

The participating interest represents an investment by Elysian Fuels No 24 Plc ("the Company") in 96% of the total members' capital of Elysian Fuels 24 LLP ("the LLP"), which is registered in England and Wales. Under the terms of the LLP agreement, the company does not have control over the partnership and, as such, is not considered to be the parent company of the LLP.

The LLP's business is that of providing services in production and exploitation of bio fuels. Its future income is dependent on the success of these activities, market conditions on completion and other factors not known at the time of the investment. The directors established that the cost of the company's investment was appropriate at the date it was made.

However subsequent to the date the investment was made the global crude oil price has dropped considerably by more than 50% and appears likely to stay at the current low levels for the foreseeable future. This has had a significant knock on effect on the bio fuel industry as Ethanol has become a less attractive blend for gasoline, with Ethanol prices dropping by over 30%. In light of these significant changes in the global market conditions which affect the business of the LLP, the directors have re-evaluated the expected returns the company is likely to generate from its investment in the LLP. Taking into account the most recent cash flow forecasts of the LLP and the PLC's likely share of future profits, the directors have assessed that at 5th April 2015, it is now more likely than not, that the PLC will not receive a return on its original investment. In accordance with Financial Reporting Standard 11 'Impairment of Fixed Assets and Goodwill' and the concept of prudence, the directors have fully impaired the value of the investment within these financial statements.
