Layton Kaye Limited

Notes to the Financial Statements

Year ended 30 November 2018

1. General information

The company is a private company limited by shares, registered in England and Wales. The address of the registered office is 51 Norwood High Street, London, SE27 9JS.

2. Statement of compliance

These financial statements have been prepared in compliance with Section 1A of FRS 102, 'The Financial Reporting Standard applicable in the UK and the Republic of Ireland'.

3. Accounting policies

Basis of preparation

The financial statements have been prepared on the historical cost basis, as modified by the revaluation of certain financial assets and liabilities and investment properties measured at fair value through profit or loss.

The financial statements are prepared in sterling, which is the functional currency of the entity.

Disclosure exemptions

The entity satisfies the criteria of being a qualifying entity as defined in FRS 102. As such, advantage has been taken of the following disclosure exemptions available under paragraph 1.12 of FRS 102:

Revenue recognition

Turnover is measured at the fair value of the consideration received or receivable for goods supplied and services rendered, net of discounts and Value Added Tax. Revenue from the sale of goods is recognised when the significant risks and rewards of ownership have transferred to the buyer (usually on despatch of the goods); the amount of revenue can be measured reliably; it is probable that the associated economic benefits will flow to the entity; and the costs incurred or to be incurred in respect of the transactions can be measured reliably.

Tangible assets

Tangible assets are initially recorded at cost, and subsequently stated at cost less any accumulated depreciation and impairment losses. Any tangible assets carried at revalued amounts are recorded at the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. An increase in the carrying amount of an asset as a result of a revaluation, is recognised in other comprehensive income and accumulated in equity, except to the extent it reverses a revaluation decrease of the same asset previously recognised in profit or loss. A decrease in the carrying amount of an asset as a result of revaluation, is recognised in other comprehensive income to the extent of any previously recognised revaluation increase accumulated in equity in respect of that asset. Where a revaluation decrease exceeds the accumulated revaluation gains accumulated in equity in respect of that asset, the excess shall be recognised in profit or loss.

Depreciation

Depreciation is calculated so as to write off the cost or valuation of an asset, less its residual value, over the useful economic life of that asset as follows:

Equipment - 20% reducing balance

Impairment of fixed assets

A review for indicators of impairment is carried out at each reporting date, with the recoverable amount being estimated where such indicators exist. Where the carrying value exceeds the recoverable amount, the asset is impaired accordingly. Prior impairments are also reviewed for possible reversal at each reporting date. For the purposes of impairment testing, when it is not possible to estimate the recoverable amount of an individual asset, an estimate is made of the recoverable amount of the cash-generating unit to which the asset belongs. The cash-generating unit is the smallest identifiable group of assets that includes the asset and generates cash inflows that largely independent of the cash inflows from other assets or groups of assets. For impairment testing of goodwill, the goodwill acquired in a business combination is, from the acquisition date, allocated to each of the cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the company are assigned to those units.

Financial instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities. Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities. Financial liabilities are presented as such in the balance sheet. Finance costs and gains or losses relating to financial liabilities are included in the profit and loss account. Finance costs are calculated so as to produce a constant rate of return on the outstanding liability. Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited direct to equity. Compound instruments Compound instruments comprise both a liability and an equity component. At date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar debt instrument. The liability component is accounted for as a financial liability. The residual is the difference between the net proceeds of issue and the liability component (at time of issue). The residual is the equity component, which is accounted for as an equity instrument. The interest expense on the liability component is calculated applying the effective interest rate for the liability component of the instrument. The difference between this amount and any repayments is added to the carrying amount of the liability in the balance sheet.

Hedge accounting

Hedge accounting is used where the hedging relationship is designated, documented and expected to be highly effective, and is only used for specific risks, as defined by FRS 102 section 12. Where the hedged risk is the exposure to a fixed interest rate risk or foreign exchange risk of a debt instrument measured at amortised cost or the price risk of a commodity that it holds or has a firm commitment, the hedging instrument is recognised as an asset or liability with the change in fair value being recognised in profit or loss. The change in fair value of the hedged item related to the hedged risk is recognised in profit or loss and as an adjustment to the carrying amount of the hedged item. Where the hedged risk is the variable interest rate risk or foreign exchange risk in a debt instrument measured at amortised cost, the foreign exchange risk or interest rate risk in a firm commitment or highly probably forecast transaction, the commodity price risk in a highly probable forecast transaction or the foreign exchange risk in a net investment in a foreign operation, then the financial instrument is initially and subsequently recognised at fair value at each reporting date. Movements in fair value are recognised in other comprehensive income, to the extent that the hedge is effective. Any ineffective movements are recognised in profit or loss. Where the hedged risk is the variable or fixed interest rate risk of a debt instrument measured at amortised cost, the periodic net cash settlements on the interest rate swap are recognised in profit or loss in the period in which the net settlements accrue. Hedge accounting is discontinued where the hedging instrument expires, is sold or terminated, the hedge no longer meets the criteria for hedge accounting, the forecast transaction is no longer highly probable in a hedge of a forecast transaction, or the designation is revoked.

4. Employee numbers

The average number of persons employed by the company during the year amounted to 2 (2017: 2).

5. Tangible assets

	Equipment	Total
	£	£
