#### Annual report of the directors

IBIDEN Europe B.V. is a private company organized and existing under the laws of the Netherlands, having its registered office at Polarisavenue 85F, 2132 JH Hoofddorp, The Netherlands.

The board of directors of IBIDEN Europe B.V. (hereafter 'the Company') hereby submits its annual financial report for the year ended 31 March 2019. The ultimate parent company is IBIDEN Co., Ltd, Japan, which holds 100% shares in the Company. The ultimate parent, the Company and all affiliated companies are referred to as the 'Group'.

#### 1.1 Overview of activities

The activities of the Company mainly concern procurement and distribution of automotive parts, diesel particulate filters (DPF), alumina fibre mats (MAT) and fine graphite material (FGM), manufactured by the parent company and manufacturing entities in the Group. The Company is also involved in procurement and distribution of raw material to its manufacturing subsidiaries.

The Company maintains four sales offices. It owns majority shares in three manufacturing entities. The sales offices are located in Stuttgart, London, Paris and Turin. Amsterdam branch sales office is closed as of March 2019, activities are continued in the Company's office in Hoofddorp.

Sales are mostly made within the European Union. The four sales offices primarily sell automotive parts (DPF and MAT). The Company's office in Hoofddorp handles FGM sales. The main customers of the Company are first and second tier suppliers for passenger cars and heavy duty trucks original equipment manufacturers.

The subsidiaries IBIDEN DPF France S.A.S. (IDFS) and IBIDEN Hungary Kft. (IHU) produce automotive parts. IBIDEN Porzellanfabrik Frauenthal GmbH (IPF) produces selective catalytic reduction (SCR). Ceram Liegenschaftsverwaltungs GmbH (CLV) is co-owner of the land and properties on which IPF has its business.

#### 1.2 Main risks and uncertainties

- 1. The Company maintains an internal committee, the Risk Management Committee (hereinafter referred to as the RMC), headed by the Managing Director and participated by branch managers. The RMC is responsible for conducting the risk management over the Company. Biweekly it identifies and reviews various risks, evaluate their importance, discuss about and implement appropriate measures independently within the Company and/or in coordination with the group companies in the group as appropriate, and report to the ultimate parent. Group policy is to avoid risks as much as possible e.g. the risk appetite for all below mentioned risks is low.
- 2. Most significant risks and the risk reduction measures taken
- (1) Macro economic situation

The Company's most important business is the distribution, mainly in Europe, of automotive parts manufactured by group companies including the ultimate parent. The increase in demand for cars with recently developed and future power trains other than diesel, i.e., hybrid and electronic, may affect the Company. To counter this, IBIDEN Co., Ltd has formed an alliance with global automotive supplier DENSO Corporation to jointly develop the next-generation vehicle exhaust system.

(2) Environmental regulations

The environmental regulations and scrutiny in respect of vehicle emission in Europe may result for identification purposes only demand decrease for our automotive parts. The Company is trying to diversify.

Initialed
for identification purposes only
mayerns ulvoling accountants LLP

#### (3) R&D capability of the group companies

The group companies have constantly allocated resources and, to date, succeeded in developing new technologies and products that meet tougher environmental requirements.

#### (4) Price competition

Automotive parts that the Company distributes are in the constant price competition. The group companies including the ultimate parent focus on developing new technologies and products with added value to customers to improve manufacturing process and to reduce costs of external procurements.

#### (5) Quality control capacity of group companies

The group companies have constantly made organizational efforts in quality control and production capacity expansion. The manufacturing plants of the group companies are spread in 4 countries, being Hungary, France, Japan and Mexico.

#### (6) Production capacity of group companies

In addition to new products that meet ever stringent environmental regulations, the Company depends entirely on the capacity of the group companies to constantly produce automotive parts, sufficient in quantity to satisfy customers' demand and with quality above certain specifications pre-agreed with customers. Non-performance can adversely affect customers' confidence in the Company and the group companies and business relationship. The Company performs its best in following customer demand forecast and technological requirements and communicating such information to the group companies.

#### (7) Foreign exchange risks

The Company conducts its business basically in EUR, but the business of its London Branch generates GBP-denominated VAT obligations, amounting to around GBP 5 million annually. The Company carefully builds GBP-denominated bank deposit assets to square its GBP/EUR positions and minimizes possible negative impact on its financial performance.

#### (8) Interest rate risk

The Company acts as an intra-group financier for its 3 group companies in Europe, through the pooling program and bilateral loan facilities. None of intra-group placements/borrowings is a long-term fixed rate contract, but all of them are under variable interest rate contracts that adopt short-term bench-mark such as 3-month Euribor. Accordingly the Company is rarely exposed to material interest rate fluctuation.

#### (9) Impairment in asset value

As per 31 March 2019 the Company holds equity investments in 4 group companies for which the carrying amount amounts to EUR 66,944,197 (31 March 2018: EUR 108,901,878). If their financial performance deteriorates and eventually the Company judges their recoverable amount is below the book value, the Company suffers from impairment loss. Due to disappointing development of the sales markets, in particular for S-CAT and D-CAT markets, the Company recognized clear indications that the carrying value of the shares in IPF should be subject to impairment. The Company carried out a discounted cash flow analysis mainly based on IPF's medium-term business plan to determine the value in use and concluded that the carrying value should be impaired with EUR 42,957,681.

#### (10) Information security

The Company collects, holds, and employs, under its strict control, various technical, tradentimetrical, tradentimetrical, tradentimetrical, and managerial information. For their protection, the Company has implemented and abited to internal rules and trained its employees. Measures to improve cybersecurity have been taken.

EY Building a better working world

(11) Other compliance risks

The Company is constantly monitoring business procedures and processes to make sure no compliance risks may materialize.

3. Risk impact and likelihood of risk occurring

Risk categories and identified risks	Impact of risk materialization	Likelihood of risk
Macro economic situation	Medium	materialization Medium
Environmental regulations	High	Medium
R&D capability of the group companies	High	Low
Price competition	Medium	Medium
Quality control capability of the group compani	High	Low
Production capacity of the group companies	High	Medium
Foreign exchange risk	Low	Medium
Interest rate risk	Low	Medium
Impairment in assets value	High	Medium
Information security	Medium	Low
Other Compliance risks	Medium	Low

Risks and uncertainties occurring in the past financial year, and the consequences

No specific risks and uncertainties occurred in the past financial year.

5. Current or planned improvements in the risk management system

The so called Risk Management Committee ('RMC') judges whether the existing risk management methodology meets the requirements of the Company. The RMC intends to improve its activities by implementing comments and recommendations to be given by internal and external auditors and advisors.

#### 1.3 Overview of results

The net turnover decreased by EUR 90 million (21%) to EUR 340 million compared with the previous year, which is a result of decreased sales in DPF mainly because of production difficulties in the Hungarian factory (IHU), main supplier of DPF. The gross profit decreased by EUR 7 million (24%) to EUR 21 million mainly as a result of the decrease in sales.

In 2018/2019 selling, general and administration expenses (SG&A expenses) decreased by EUR 2.4 million. The Company's operating margin amounts to EUR 8.7 million, a decrease of EUR 4.4 million compared with the previous year mainly due to decrease in gross margin. The Company's net result after taxation ended with EUR 16.6 million loss mainly due to impairment loss on financial fixed assets of EUR 43 million and a dividend income of EUR 20 million. In previous year the Company's result was a profit of EUR 69 million, mainly due to dividend income of EUR 60 million.

The Company has sufficient solvency and liquidity. The solvency ratio (total equity/total assets) as per 31 March 2019 equals 0.72 (31 March 2018: 0.58). The liquidity ratio (current assets/current liabilities) equals 2.28 (31 March 2018: 1.43).

The increase in liquidity ratio is mainly caused by a reduction of available cash in the subsidiaries.

This causes their positive cash pooling balance with the Company to turn into negative balance and therefore a receivable for the Company.

The increase in solvency ratio is mainly caused by reduction of the assets due to the impairmental Accountants LLP IPF and the reduction in cash at banks.

EY Building a better working world

#### 1.4 Resignation and appointment of member of the management board

Mr. Masanori Seki, Vice President of IDFS, joined as a non-executive board member as of May 1, 2018 and he resigned as at January 4, 2019.

#### 1.5 Subsequent events

#### Closing IBIDEN DPF France S.A.S. (IDFS)

Because of structural loss making operations combined with production shifting by the customers (Tier 1 suppliers of the automotive industries) to lower costs nations the decision has been taken by the Board of Directors of Ibiden Co., Ltd. to close down IDFS completely. The first wave of staff dismissal has begun April 2019 and is expected to be finalized April 2020. The site and buildings of IDFS has been sold to a third party in December 2019.

Name change IBIDEN Porzellanfabrik Frauenthal GmbH
In April 2019 IBIDEN Porzellanfabrik Frauenthal GmbH was renamed into IBIDEN Ceram GmbH.

#### Capital investment

On the 25th of April 2019 the parent company Ibiden Co., Ltd. provided a capital contribution of EUR 30 million to the Company. Additionally, on the 25th of October 2019 the parent company Ibiden Co., Ltd. provided a loan of EUR 20 million to the company. The capital contribution and the loan have been mainly used to provide short term loans to IDFS to cover costs of the closing and to IHU for its operating fund.

There are no further subsequent events known at this time.

#### 1.6 Outlook for 2019/2020

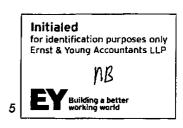

The industry sector where the Company is active, the automotive parts industry, continues to be competitive. Customers are demanding in respect of product quality, prices, delivery and R&D capability, in view of even harsher environmental regulatory requirements.

The Company will face a strong headwind as the automobile market for diesel cars in Europe is diminishing. This is expected to negatively impact sales figures for 2019/2020. However, the Company tries to overcome the situation by selling more to the heavy duty car manufacturers or to the non-road car manufacturers. Also the Company is looking into the possibilities of the market for particulate filters for petrol passenger cars.

The Company will continue to focus on cost saving efforts to retain as much profitability as possible.

The Company has succeeded in establishing an important market share in the relevant industry sector. It will continue to strengthen its sales positions by focusing on customers' needs in cooperation with the parent company and manufacturing subsidiaries. The main goal is to become more customer-oriented both in sales and R&D activities.

No significant investments or reduction in workforce are planned.

#### 1.7 Board of directors

As of 1 January 2013, the 'Wet Bestuur en Toezicht', a new Management and Supervision Act came into effect. The new act requires a large-sized N.V. or B.V. to seek for a balanced distribution on their management and supervisory boards, with at least 30% of the seats occupied by women, and at least 30% by men. The current composition of the Board deviates from the above mentioned percentages.

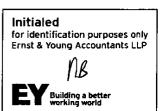

The Company will pursue a policy to continue to comply with the guidelines of the act and continues to strive for an adequate and balanced composition of its Board in future appointments, by taking into account all relevant selection criteria, including but not limited to gender balance and executive experience.

The balanced situation as outlined in the above mentioned articles would only be realized if and when vacancies may become available and only to the extent that compliant candidates are of equal quality.

Hoofddorp, 5 March, 2020

The Board of Directors,

A. Yamada

#### Notes to the balance sheet and profit and loss account

#### 1. General

IBIDEN Europe B.V. (hereinafter "the Company") is a private company, has its statutory seat in Hoofddorp and is registered under number 33234926 at the Chamber of Commerce.

#### 1.1 Activities

The activities of the Company mainly concern procurement and distribution of automotive parts, diesel particulate filters (DPF) and alumina fibre mats (MAT), and fine graphite material (FGM), manufactured by the parent company and manufacturing entities in the Group. The Company is also involved in procurement and distribution of raw material to its manufacturing subsidiaries.

The Company maintains four sales offices. It owns majority shares in three manufacturing entities. The sales offices are located in Stuttgart, London, Paris and Turin. Amsterdam branch sales office is closed as of March 2019, activities are continued in the Company's office in Hoofddorp.

Sales are mostly made within the European Union. Three out of the five sales offices primarily sell automotive parts and one office focuses on FGM. The main customers of the Company are first and second tier suppliers for passenger cars and heavy duty trucks of Original Equipment Manufacturers.

#### 1.2 Group structure

The parent company refers to IBIDEN Co., Ltd., Japan, which holds 100% shares in the Company and belongs to the IBIDEN group. The ultimate parent company of the group is IBIDEN Co, Ltd. in Ogaki, Japan.

The subsidiaries IBIDEN DPF France S.A.S. (IDFS) and IBIDEN Hungary Kft. (IHU) produce automotive parts. IBIDEN Porzellanfabrik Frauenthal GmbH (IPF) produces selective catalytic reduction (SCR). CERAM Liegenschaftsverwaltungs GmbH (CLV) is the co-owner of the ground and properties on which IBG conducts its operations.

#### 1.3 Consolidation

The Company does not prepare consolidated annual accounts since it makes use of the consolidation exemption offered by article 408, Book 2 of the Dutch Civil Code. Therefore, reference is made to the consolidated annual accounts of IBIDEN Co., Ltd., Japan, the sole shareholder of the Company. The consolidated annual accounts are available at the Dutch chamber of commerce and at <a href="https://www.ibiden.com">www.ibiden.com</a>.

#### 1.4 Related-party transactions

All legal entities that can be controlled, jointly controlled or significantly influenced are considered to be related parties. Also, entities which can control the Company are considered as related parties. In addition, statutory directors, other key management of the Company, the ultimate parent company and close relatives are regarded as related parties.

Initialed

Significant transactions with related parties are disclosed in the notes. The nature, extended in the notes of the nature, extended in the notes. The nature, extended in the notes of the nature, extended in the notes. The nature, extended in the notes of the nature, extended in the notes of the nature, extended in the nature in

Building a better working world

#### 1.5 Changes in accounting policies

The accounting policies have not been changed compared to 2017/2018. The policies have been consistently applied.

#### 1.6 Judgments and estimates

The preparation of annual accounts in conformity with the relevant rules requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the financial statements in future periods. If necessary for the purposes of providing the view required under Section 362(1), Book 2 of the Netherlands Civil Code, the nature of these estimates and judgments, including the related assumptions, is disclosed in the notes to the financial statement items in question. Management considers the valuation of the financial fixed assets has the most significant effect on the financial statements; further reference is made to section 2.8 for the accounting policies for valuation of fixed assets.

#### 1.7 Cash flow statement

As the share capital of the Company is wholly owned by Ibiden Co., Ltd., Japan, the Company made use of the exemption with respect to the preparation of a cash flow statement, as laid down in the accounting policies generally accepted in the Netherlands (RJ 360.104). The consolidated annual accounts are available at the Dutch chamber of commerce and at www.ibiden.com.

#### 2. Principles of valuation of assets and liabilities

#### 2.1 General

The annual accounts were prepared in accordance with the statutory provisions of Title 2.9, Book 2 of the Netherlands Civil Code and the firm pronouncements in the Dutch Accounting Standards for Annual Reporting in the Netherlands as issued by the Dutch Accounting Standards Board. In general, assets and liabilities are stated at the amounts at which they were acquired or incurred, or fair value. The balance sheet and profit and loss account include references to the notes.

#### 2.2 Comparative figures

The principles of valuation and determination of result and presentation have not been changed compared to the prior year.

#### 2.3 Foreign currencies

Functional currency

ttems included in the annual accounts are measured using the currency of the primary economic dentification purposes only environment in which the Company operates. The annual accounts are presented in Eurer Marichule, Accountants LLP the functional and presentation currency of the Company. The participations are also administrated in Euro.

Transactions, assets and liabilities

Foreign currency transactions in the reporting period are translated into Euro using the exchange rates prevailing at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the rate of exchange prevailing at the balance sheet date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates are recognised in the profit and loss account.

Translation differences on non-monetary assets held at cost are recognised using the exchange rates prevailing at the dates of the transactions or the approximated rates.

The assets and liabilities of foreign activities are translated into the presentation currency (euros) at the rate of exchange ruling at the balance sheet date and the income and expenses of these foreign activities are translated at the rates ruling on the transaction date. Resulting exchange differences are taken directly to the legal foreign currency translation reserve. On the disposal of a foreign activity, the cumulative exchange differences taken directly to the reserves are taken to the profit and loss account as part of the gain or loss on the sale.

#### 2.4 Offsetting

Assets and liabilities are only offset in the financial statements if and to the extent that:

- An enforceable legal right exists to offset the assets and liabilities and settle them simultaneously; And
- The positive intention is to settle the assets and liabilities on a net basis or simultaneously.

#### 2.5 Intangible fixed assets

An intangible fixed asset is recognized in the balance sheet if:

- It is probable that the future economic benefits that are attributable to the asset will accrue to the Company.
- The cost of the asset can be reliably measured.

Intangible assets are stated at historical cost less amortisation. Allowance is made for any impairment losses expected; a loss qualifies as an impairment loss if the carrying amount of the asset (or of the cash-generating unit to which it belongs) exceeds its recoverable amount. For details on how to determine whether an intangible asset is impaired, please refer to Note 2.8 below.

#### Computer software

Software licenses acquired are capitalised as acquisition cost and amortised over their estimated future useful lives. Expenditures that are attributable to the production of identifiable and unique software products controlled by the Company are capitalised. Costs associated with maintaining computer software and research expenditure are recognized in the income statement. Computer software is amortised at a rate of 20% per annum.

#### Goodwill

Goodwill on acquisitions is capitalised and amortised on a straight-line basis over its estimated and amortised on a straight-line basis over its estimated and useful life. Goodwill is amortised at a rate of 10% per annum.

The amortization charges on computer software and goodwill are included in the line item Genural // 18 and administrative expenses of the Profit and Loss Account.

IBIDEN Europe B.V., Hoofddorp

for identification purposes only Ernst & Young Accountants LLP

#### 2.6 Tangible fixed assets

Land and buildings are valued at acquisition cost plus additional expenses less straight-line depreciation over the estimated useful economic life. Land is not depreciated. Buildings are depreciated at a rate of 4% per annum. There is no major obligation for restoration after the use of the asset (decommissioning costs). Costs associated with repair and maintenance are taken directly to the profit and loss account.

Office equipment is valued at acquisition cost less accumulated depreciation. Depreciation is on a straight-line basis over the estimated economic lives of the related assets. Office equipment is depreciated at a rate of 20% per annum.

When determining the depreciation charge of an asset, the residual value of the asset is taken into account.

Any impairment as at the balance sheet date is taken into account (see 2.8).

#### 2.7 Financial fixed assets

#### Investments in Group companies

Investments in Group companies are recorded at cost being the purchase price agreed, the fair value of contingent assets and costs directly attributable to the acquisition. If an asset qualifies as impaired, it is measured at its impaired value: any write-offs are recorded in the profit and loss account (see 2.8).

#### Loans

Long term loans are initially recognized at fair value and subsequently measured at amortized cost. If a loan qualifies as impaired, it is measured at its impaired value: any write-offs are recorded in the profit and loss account (see 2.8).

#### Other receivables

Other receivables disclosed under financial assets include loans and other long term receivables. These receivables are initially measured at fair value, and subsequently carried at amortised cost. Impairment losses are deducted from amortised cost and expensed in the profit and loss account.

#### 2.8 Impairment of fixed assets and its recognition

On the balance sheet date, the Company assesses whether there are any indications of an asset which could be subject to impairment. If there are such indications, the recoverable amount, being the lower of the asset's fair value less costs to sell and value in use, is estimated. If this is not possible, the recoverable amount of the cash-generating unit to which the asset belongs, is identified. An asset is subject to impairment if its carrying amount exceeds its recoverable amount.

Fair value less costs to sell is determined based on the active market. An impairment loss is directly expensed in the profit and loss account. Value in use is calculated based on future discounted cash flows.

If it is established that a previously recognised impairment loss no longer applies or has declined, the increased carrying amount of the assets in question is not set any higher than the carrying amount that would have been determined had no asset impairment been recognised.

#### 2.9 Inventories

Inventories of finished goods are stated at the purchase cost or at net realizable value, whichever is lower. Cost is determined using the first in, first out (FIFO) method. The purchase cost includes are ∬ ( purchase price and the additional costs. The additional costs include the import duties an

IBIDEN Europe B.V., Hoofddorp

Initialed

for identification purposes only Ernst & Young Accountants LLP

taxes, transport and handling costs and other costs that can be directly attributed to the acquisition of the finished goods. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses. Net realisable value is determined making allowance for obsolescence of inventories. The purchase price for goods delivered by group companies is a fixed percentage of the sales price to external customers.

#### 2.10 Trade-receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost. If payment of the receivable is postponed under an extended payment deadline, fair value is measured on the basis of the discounted value of the expected revenues. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables.

#### 2.11 Cash and cash equivalents

Cash and cash equivalents include only cash balances in Euro currency at banks and are stated at face value.

#### 2.12 Employee benefits

#### Short-term employee benefits

Salaries, wages and social security contributions are taken to the profit and loss account based on the terms of employment, where they are due to employees.

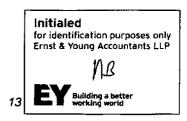

The Company recognizes an obligation if it has demonstrably committed paying a termination benefit or transition payment. If the termination is part of a reorganization, the Company includes the costs of a termination benefit or transition payment in a provision for reorganization costs.

#### Pensions

The Company pays regular contributions to the insurance company on a contractual basis. Except for the payment of contributions, the Company has no other obligation in connection with this pension plan. The main characteristics of this plan are:

- Insurer: The life insurance public company in the Netherlands. There is no contribution plan for the offices outside the Netherlands.
- Salary basis for pension: final gross monthly salary plus holiday allowance and 13<sup>th</sup> month bonus minus franchise of national pension insurance.
- Premium contribution: The employee's contribution is fixed to 3% of gross salary and the remaining part is contributed by the Company. Supplementary contribution is permitted to be made by the employee under the condition set by the insurer.
- Pension insurance: Aged pension, Widow's and Orphan's pension.
- Pension is yearly indexed based on the average consumer price index.

Contributions payable to the pension plan administrator are recognized as an expense in the profit and loss account. Contributions payable or prepaid contributions as at year-end are recognized under pension payable, and prepayments and accrued income, respectively.

#### 2.13 Taxes

#### Current taxes

Taxes are calculated on the result before tax as disclosed in the profit and loss account based on current tax rates, allowing for tax-exempt items and cost items which are non-deductible, either in whole or in part.

Tax assets and liabilities are netted if the general conditions for netting are met.

#### Deferred taxes

A deferred tax liability is recognized for all taxable temporary differences between the valuation for tax and financial reporting purposes. A deferred tax asset is recognized for all deductible temporary differences between the valuation for tax and financial reporting purposes and carry-forward losses, to the extent that it is probable that future taxable profit will be available for set-off. Deferred tax assets and liabilities are recognized under financial fixed assets and provisions, respectively.

Deferred tax liabilities and deferred tax assets are carried on the basis of the tax consequences of the realization or settlement of assets, provisions, liabilities or accruals and deferred income as planned by the group at the balance sheet date. Valuation is based on current tax rates. Deferred tax liabilities and deferred tax assets are carried at non-discounted value.

Deferred tax assets and liabilities are netted if the general conditions for netting off are met.

#### 2.14 Leasing

Assessing whether an agreement contains a lease is based on the substance at the inception date of the agreement. The agreement is regarded as a lease if the fulfilment of the agreement depends on the use of a specific asset, or on whether the lease contains the right of use of a specific asset.

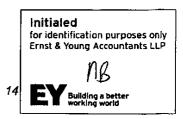

#### Operating leases - company as a lessee

The Company entered into operating lease contracts for the use of automobile, building and equipment. Leases in which significant portion of the risks and rewards incidental to the ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

The future commitments of payment towards lessor are disclosed in the paragraph 4.9 "Off-balance sheet commitments and contingent liabilities".

#### 2.15 Other assets and liabilities

All other assets and liabilities are initially recognized at fair value and subsequently measured at (amortized) cost.

#### 3. Principles for determination of result

#### General

The result represents the difference between the value of the goods and services supplied and the costs and other charges for the year. The results on transactions are recognised in the year they are realised; losses are taken as soon as they are foreseeable.

#### 3.1 Revenue recognition

#### General

Net turnover represents the proceeds from the supply of goods and services, net of taxes levied on turnover and discounts.

#### Sales of goods

Income from the sale of goods is recognized in the profit and loss account once all the major rights to economic benefits and significant risks relating to the goods have been transferred to the buyer, the income can be reliably measured and the income is probable to be received.

#### Sales of services

If the result of a transaction relating to a service can be reliably estimated and the income is probable to be received, the income relating to that service is recognized in proportion to the service delivered..

#### 3.2 Cost of sales

Cost of sales represents the direct and indirect expenses attributable to turnover. Cost of sales is recorded in the same period as the turnover is recognised.

#### 3.3 Selling expenses

Selling expenses are cost relating to sales activities that cannot be traced to individual goods sold.

#### 3.4 General and administrative expenses

Costs are recognised on the historical cost convention and are allocated to the reporting year to which they relate. Intangible assets, including goodwill, are amortised and tangible fixed assets depreciated over their estimated useful lives as from the inception of their use. Land and investment property are not depreciated. Future depreciation and amortisation is adjusted if there is a change in estimated future useful life time.

#### 3.5 Net financial income and expenses

#### Interest paid and received

Interest paid and received is recognised on a time-weighted basis, taking account of the effective interest rate of the assets and liabilities concerned.

#### 3.6 Dividends

Dividends are recognized in the profit and loss account if the Company is entitled to the nartilated dividends are probable to be received.

for identification purposes only Ernst & Young Accountants LLP

#### 3.7 Financial instruments

#### Market risk

#### a. Currency risk

The Company keeps its books in Euro since the majority of their sales and purchase are denominated in Euro, while London Branch incurs GBP-denominated VAT obligations; the Company minimizes the net GBP-EUR position by building up GBP-denominated bank deposit balances. Accordingly currency risk is considered to be limited.

#### b. Price risk

The Company has no investments in listed companies or listed debts. Hence there is limited price risk.

#### c. Interest rate risk

The Company grants a floating interest bearing loan to a subsidiary. No significant interest risk is recognized with the fair value of the loan as at the reporting date.

#### Credit Risk

There are no significant concentrations of customers with low credit standings. Sales are made to customers that meet the Company's criteria. Most goods and service are sold at payment terms ranging between 30 and 120 days.

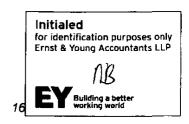

The Company has issued a loan to Ibiden Porzellanfabrik Frauenthal GmbH. This counterparty does not have a history of non-performance.

#### Liquidity Risk

Liquidity risk is very limited because of the significant positive cash position of the Company and because payment terms agreed with suppliers are similar as payment terms agreed with external customers. The Company's working capital is more than sufficient to cover the off-balance sheet obligations (2%). Please also refer to the details of the credit facilities under 4.9 Off-Balance Sheet commitments and contingent liabilities.

#### Financial Risk

At the end of March 2019 the Company holds equity investment in 4 group companies and its carrying amount amounts to EUR 66.944.197 compared to EUR 108,901,878 last year. EUR 1 million was added to the carrying amount due to an additional investment in Ceram Liegenschaftsverwaltungs GmbH which is now a 90% subsidiary. The carrying amount was decreased with EUR 43 million due to the impairment of an investment. If the financial performance of these investments deteriorates and eventually the Company judges their recoverable amount is below the book value, the Company suffers from impairment loss.

#### 4. Notes to the balance sheet

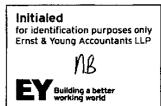

#### 4.1 Intangible fixed assets

Movements in intangible fixed assets are as follows:

	Goodwill	Software	Total
24 March 2040	EUR	EUR	EUR
31 March 2018 At cost Accumulated amortization and impairment	6,408 (6,152)	921,456 (885,387)	927,864 (891,539)
Book value	256	36,069	36,325
Movements 2018/19			
Additions Amortisation	0 (256)	0 (13,533)	0 (13,789)

BOOK Value	00,344,197	23,300,000	97,001	80,542,076

#### Impairment

The accumulated impairment as per 31 March 2019 amounts to EUR 81,657,440 (31 March 2018: EUR 38,699,759).

Due to disappointing development of the sales markets, in particular for S-CAT and D-CAT markets, the Company has recognized an impairment charge of EUR 42.957,681 on its investment in IBIDEN Porzellanfabrik Frauenthal GmbH ('IPF').

The Company has calculated the value in use to determine the recoverable amount, taking into account uncertainties in the markets in which IPF operates. To calculate the value in use, the Company used the discounted cash flow method. Key assumptions underlying the calculation of the discounted cash flow value are:

- Discount rate: 9%,
- Terminal growth rate after FY2024: 0%
- Long term inflation rate: nil
- Period after which company calculated terminal value: FY2024 and thereafter.

Building a better
working world

Investments in group companies

List of participations	Share in
	Issued Capital
IBIDEN Porzellanfabrik Frauenthal GmbH, Austria (IPF)	100%
IBIDEN DPF France S.A.S., Courtenay, France (IDFS)	100%
IBIDEN Hungary Kft, Dunavarsany, Hungary (IHU)	99%
Ceram Liegenschaftsverwaltungs GmbH, Frauenthal, Austria	90%

On 25 September 2018, IEU signed a contract with PPC Austria Holding GmbH (PPC Holding) to acquire 40% of the remaining 50% share of Ceram Liegenschaftsverwaltungs GmbH ('CLV'), Frauenthal, Austria, which were previously owned by PPC Holding for the amount of EUR 1 million. After the acquisition, IEU's shareholding of CLV will become 90% and the remaining 10% will be purchased and owned by IBIDEN Porzellanfabrik Frauenthal GmbH (IPF). By the acquisition of CLV shares, IEU and IPF will become the co-owner of the land and property where IBG has its machineries and equipment to produce SCR products. IPF will simultaneously purchase the body supply equipment from PPC Insulators Austria GmbH (PPC Austria) which is necessary to produce the body supply for N-Cat products (PPC Austria was the 100% supplier of the body supply to ICG)

In April 2019 IBIDEN Porzellanfabrik Frauenthal GmbH was renamed into IBIDEN Ceram GmbH.

#### Long term loans

On 1 June 2012 the Company granted a loan of EUR 36 million to its subsidiary, IBIDEN Porzellanfabrik Frauenthal GmbH. The balance as per March 31, 2019 amounts to EUR 23.5 million. The interest rate is fixed at three month EURIBOR (zero floor) plus a 0.8125% margin and the loan falls due every three months. The loan is revolved if indicated by one of the parties by the end of each three month period. The loan is classified as long term loan since there is no clear intention to settle the amount within one year after the balance sheet date.

#### 4.4 Stocks

#### Proposed appropriation of result

The Board of Directors proposes to deduct the result for the year from other reserves. The appropriation of the result is not reflected in these annual accounts.

#### 4.8 Current liabilities

	31 March 2019	31 March 2018
	EUR	EUR
Trade creditors	922,514	117.974
Due to parent company	18,722,003	16,577,564
Due to group companies	37,341,099	60,737,991
Due to customers	9,649,213	0
Cash pooling to group companies	0	48,004,560
Accrued expenses and other payables	2,417,524	2,963,072
Deferred income	1,381,777	1,298,996
Corporate income tax payable	3,339,257	3,766,717
Wage tax and social securities	207,243	172,647
Pension premium payable	78,725	59,347
VAT payable	1,419,388	2,288,134
	75,478,743	135,987,002

The amounts due to group companies concern purchasing mainly by the branches from IBIDEN Hungary Kft., IBIDEN DPF France S.A.S. and IBIDEN Mexico S.A.

The cash pooling to group companies is the result of netting of outstanding balances of group companies. The applicable interest rate on the cash pooling was zero throughout 2018/2019. Under the cash pooling program any debit/credit closing balance in participants' EUR accounts with SMBC is daily transferred to the Company's pooling centre account and next morning reversed to each participant. When the Company receives money, it pays ECB Main Refinancing Rate – 0.45%. When the Company places money, it receives ECB Main Refinancing Rate + 0.85%. During FY2018/2019 ECB Main Refinancing Rate stayed always below 0.25%. Accordingly there was no interest paid.

All current liabilities fall due in less than one year. The fair value of the current liabilities approximates the book value due to its short term character. No guarantee has been given to secure the above mentioned liabilities.

#### 4.9 Off-balance sheet commitments and contingent liabilities

#### Long-term financial obligations

Operating leases include the rental of property and company cars. Amounts due under operating leases as at 31 March 2019 are:

	31 March 2019	31 March 2018
Due in one year Due in more than one year and less than 5 years Due in more than 5 years	EUR 388,285 764,126 252,847	EUR 308,809 Gitialed Gerigerit (Cation purposes only errist & Young Accountants LLP
IBIDEN Europe B.V., Hoofddorp	1,405,258	1,283,783 MB  By Building a better working world

The amount of operational lease expenses charged to the profit and loss account is EUR 106,304 (2017/2018; EUR 159,935).

#### Guarantees

There is 1 guarantee amounting to EUR 28,058 at 31 March 2019 (31 March 2018: EUR 28,058) on behalf of the Company by one of its banks. The guarantee concerns the Company's office lease contract.

#### Credit facilities

The Company is granted an uncommitted credit facility of EUR 30 million (31 March 2018 EUR 30 million), no portion of that was utilized as of 31 March 2019 (31 March 2018: none).

#### 5. Notes to the profit and loss account

#### 5.3 Net financial income and expenses

	2018/2019	2017/2018
	EUR	EUR
Interest income Foreign exchange differences Interest expense	269,632 97,847 (56,567)	256,945 (467,001) (284)
	310,912	(210,340)

Interest income from subsidiaries amounts to EUR 269,632 (2017/2018: EUR 256,945).

#### 5.4 Impairment

	2018/2019	2017/2018
	EUR	EUR
IBIDEN Porzellanfabrik write-off	42,957,681	0

In view of the financial performance of IPF in the last few years, the Company recognized clear indications that the carrying value of the shares in IPF should be subject to impairment. The Company carried out the discount cash flow analysis on IPF's medium-term business plan to conclude the carrying value should be written-off with an amount of EUR 43 million. No clear indication for (reversal of) impairment were recognized in the current year.

#### 5.5 Taxation

The standard tax rate in the Netherlands is 25%, with a tax rate of 20% applied up to the taxable income until EUR 200,000. The Company however operates through branches in different countries where higher tax rates are levied. The main reasons for effective tax rate change are referred to below. The movement in effective tax rate can mainly be explained by non-deductible impairment charges in the current year which resulted in a positive taxable income and tax charge while the result before tax is negative.

	2018/2019	2017/2018
	EUR	EUR
Result from ordinary activities before taxation	(13,320,287)	73,188,782
At the statutory tax rate of 25%	(3,340,072)	18,287,196
Non-deductible expenses relating to impairment	10,739,420	-
Non-taxable (dividend) income	(5,000,000)	(15,000,000)
Differences in tax rate in local branches	882,749	846,410
Income tax for the year	3,282,097	4,133,606
Effective tax rate	(25)%	Initialed for identification purposes only Ernst & Poung Accountants LLP
IBIDEN Europe B.V., Hoofddorp		25 EY Building a better working world

The participation exemption is applied to the Company's dividend income on its investment in subsidiaries (dividend received).

#### 6. Supplementary information

#### 6.1 Average number of employees

## Independent auditor's report

To: the shareholder and management of IBIDEN Europe B.V.

# Report on the audit of the financial statements for the financial year ended 31 March 2019 included in the annual report

Our opinion

We have audited the financial statements for the financial year ended 31 March 2019 of IBIDEN Europe B.V., based in Hoofddorp.

In our opinion the accompanying financial statements give a true and fair view of the financial position of IBIDEN Europe B.V. for the year ended 31 March 2019, and of its result for the year then ended in accordance with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

The balance sheet for the year ended 31 March 2019

The profit and loss account for the year then ended

The notes comprising a summary of the accounting policies and other explanatory information

#### Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the "Our responsibilities for the audit of the financial statements" section of our report.

We are independent of IBIDEN Europe B.V. in accordance with the Wet toezicht accountantsorganisaties (Wta, Audit firms supervision act), the Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore, we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Report on other information included in the annual report

In addition to the financial statements and our auditor's report thereon, the annual report contains other information that consists of:

Annual report of the directors

Other information as required by Part 9 of Book 2 of the Dutch Civil Code

Based on the following procedures performed, we conclude that the other information: Is consistent with the financial statements and does not contain material misstatements Contains the information as required by Part 9 of Book 2 of the Dutch Civil Code

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements. By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of the procedures performed is substantially less than the scope of those performed in our audit of the financial statements.

Management is responsible for the preparation of the other information, including the management report in accordance with Part 9 of Book 2 of the Dutch Civil Code and other information as required by Part 9 of Book 2 of the Dutch Civil Code.

## Description of responsibilities for the financial statements

Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Part 9 of Book 2 of the Dutch Civil Code. Furthermore, management is responsible for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, management is responsible for assessing the company's ability to continue as a going concern. Based on the financial reporting framework mentioned, management should prepare the financial statements using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so. Management should disclose events and circumstances that may cast significant doubt on the company's ability to continue as a going concern in the financial statements.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit engagement in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not detect all material errors and fraud during our audit.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgment and have maintained professional skepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. Our audit included among others:

Identifying and assessing the risks of material misstatement of the financial statements, whether due to fraud or error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control

Obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control

Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management

Concluding on the appropriateness of management's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company to cease to continue as a going concern

Evaluating the overall presentation, structure and content of the financial statements, including the disclosures

Evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

Because we are ultimately responsible for the opinion, we are also responsible for directing, supervising and performing the group audit. In this respect we have determined the nature and extent of the audit procedures to be carried out for group entities. Decisive were the size and/or the risk profile of the group entities or operations. On this basis, we selected group entities for which an audit or review had to be carried out on the complete set of financial information or specific items.

We communicate with management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit.
